

2024 ANNUAL REPORT

Bounty is an Australian ASX listed group (ASX: BUY) with significant exposure to existing Australian oil production, development and exploration permits in proved areas of the Cooper and Surat Basin hydrocarbon provinces.

Its proved producing oil reserves and resources total 360,000 boe.

Bounty's major targets are centred in West Australia (Jacobson + Rough Range, Carnarvon Basin, WA oil and gas) and in PEP 11, (Sydney Basin, NSW gas). Bounty has material value growth potential through oil and natural gas.

KEY OUTCOMES/OUTLOOK

Full Year 2024 - Results

- › Group petroleum revenue for the year was \$1.61 million (2023: \$1.77 million) from Queensland oil sales, with stable crude oil prices.
- › Cash and current assets at 30 June 2024 - \$1.78 million.
- › Bounty group producing and contingent oil reserves in Queensland now 360,000 bbls with Watkins North NFE's exploiting the additional Cooper Basin discoveries and with Surat Basin acquisitions.
- › Operating loss of \$0.61 million (2023: \$0.44 million) before non-cash expenses.

2025 OUTLOOK

- › The successful 3 well drilling campaign at Watkins North; Naccowlah Block will see Bounty maintain oil production from the Block and add to NFE drill opportunities for 2025.
- › Bounty is preparing to produce additional oil from its operated Surat Basin projects.
- › Bounty participating in exploration of offshore West Australia Carnarvon Basin Jacobson permits aiming at deeper oil/gas major targets under its farm in agreement.

CHAIRMAN'S REVIEW

Dear Shareholders

Bounty's far sighted view that it should build oil reserves and resources in proven onshore basins in Australian while pursuing major Offshore exploration plays has seen a significant strengthening of Bounty in 2024.

In the Cooper Basin, Queensland; new oil discoveries with Watkins North 2 well (Bounty 10%); and Watkins North 1 Well (Bounty 2%); have provided excellent additions to Bounty's proven reserves and resources of light sweet crude in the Naccowlah Block. These wells were tied into the Naccowlah production pipelines and added significant proved reserves as at 31 December 2023.

The net result was to lift our reserves and resources to over 300,000 barrels in an environment where the international crude oil price averaged \$119 per barrel. Although revenue was slightly lower Watkins North maintained Bounty's oil revenue at \$1.61 million for the period.

In the Surat Basin, Queensland; Bounty has added new proven reserves in the Alton area. As a result, Bounty's total proved 1P and 2P reserves and resources in Southern Surat Basin has now lifted to 154,000 barrels. This provides us with a very significant underlying asset to Bounty's balance sheet and Bounty is moving towards commencement of oil production at Alton.

These improvements are fundamental to building a long-term future in the resource business.

After years of delays the Federal Government has indicated it will not grant regulatory approval of extensions to the PEP 11 offshore permit; Sydney Basin and the Joint Venture Operator, Asset Energy, has commenced new Federal Court proceedings which have been deferred into 2025. Bounty will fully pursue our rights to achieve a drill test in PEP 11.

PEP 11 is evidence of the well documented avalanche of problems arising from Australia's failure to continue exploration and development of its gas reserves which is now affecting the underlying Australian economy. Bounty hopes the relevant Commonwealth and State Regulators recognise this problem and sweep away never-ending blockages. Apart from PEP 11 Bounty is now involved in extending the Jacobson Project in West Australia.

Your dedicated management team have worked tirelessly during the year to continue Bounty's progress.

I sincerely thank the shareholders for their continuing support, and we look forward to having a good result on some of our offshore projects in 2025.

Graham Reveleigh

Chairman

30 October 2024

**Naccowlah Block – 2023/2024 - Schlumberger SLR 188 Rig - Near Field Exploration (NFE)
Drilling at Watkins North**

CEO'S REVIEW

Highlights for the Financial Year:

- Bounty participated in three successful NFE and development oil wells in Naccowlah Block in August – September 2023 recording very significant discoveries in Watkins North 1 and 2.
- Continued oil production from Naccowlah Block in 2024 exploited the additional reserves proved by these NFE drills and prior drilling campaigns.
- Cash and current assets at 30 June 2024 were \$1.28 million with zero debt.
- Petroleum revenue was marginally lower; down 6% to \$1.61 million however crude oil prices remained strong.
- Operating loss of \$ 0.93 million (2023: \$0.44 million) before non-cash expenses comprised of \$0.65 million for amortisation of producing oil assets.
- Bounty plans to participate in oil development and NFE drills in 2025 in the Cooper and Surat Basins.
- PEP 11 Joint Venture, Sydney Basin is on hold following Federal Government notices to refuse extensions however the titles continue and new action in the Federal Court of Australia has been commenced by the operator.

Forward Development Plans - Backed by Increased Oil Resources

During 2024 Bounty maintained and increased its proved producing and developed oil reserves and resources. This will, with additional capital, provide a platform for further growth in coming years where there is continuing disruption to world oil markets and a continuing decline in world oil production capacity.

These resources in the Cooper and Surat Basins, Queensland provide a platform for continuing and increasing revenue growth and a basis for new acquisitions.

Bounty improved its group oil reserve and resource position at 30 June 2024:

Queensland	
Cooper Basin – Naccowlah Block	Bounty holds 2P + 2C (Contingent) reserves of 159,000 bbls.
Surat Basin; Alton Area	Bounty holds 2P + 2C (Contingent) reserves of 154,000 bbls.
Total	313,000 bbls

See the **Project and Operations Review** and the Directors Report below for further 2024 production and revenue details and for more details on current projects.

Bounty will emerge from 2024 with a stronger reserve and resource base and its core petroleum acreage intact. Bounty anticipates continuing oil production from Naccowlah Block with additions from the recent excellent Birkhead and Westbourne zone discoveries at Watkins North supported by strong oil prices of around A\$119/bbl.

The world now consumes in excess of 100 mmbbls of oil per day and oil prices can only increase as worldwide production declines continue.

Bounty is confident that world oil prices will continue to edge upwards.

Bounty Diversifying

During the financial year Bounty advanced the Jacobson Project in the offshore Carnarvon Basin, West Australia and examined a number of other, production and exploration opportunities. Bounty is seeking other projects as a means to diversify while waiting for NOPTA's final decision on title continuation at its PEP 11 Sydney Basin Gas exploration project.

Conclusion

Oil revenue will continue at around \$1.8 million in 2025.

Australia confronts the challenge of finding more domestic oil and natural gas and producing those reserves. Bounty increased its oil reserves in the year to 31 December 2023 and with the Watkins North discoveries is well placed for additional reserves growth into 2025.

Bounty will participate in all further NFE and development drilling programs in Naccowlah Block - there are at least 9 sites for additional appraisal and NFE wells in the Jackson and Watson areas of the Block. Bounty also expects oil production growth from Naccowlah Block enhancement projects and its own Surat Basin operated projects.

Bounty will also look to target major oil and gas prospect drilling at Jacobson in West Australia now that we are close to resolving funding issues. The concept is to commit to drill for deep Permian natural gas in the Jacobson Project areas.

PHILIP F. KELSO

Chief Executive Officer

30 October 2024

AUSTRALIAN PROJECT AND OPERATIONS REVIEW 2024

Bounty Projects

Bounty has production and exploration operations in three states within Australia.

Summary Land Position

Offshore (Commonwealth)	Equity	Gross Km ²	Net Km ²
PEP-11	15%	4,576	686
Carnarvon Basin WA			
Jacobson (Jacobson)	25% ⁶	3759	940
Rough Range	100%	80	80
Onshore QLD			
Naccowlah SW Queensland	2%/10%	1,794	36
Surat Basin Queensland	Various	134	118
Totals		10,342	1,859
1. Earning 25% with option to 50%			

Table 2 summarises Bounty's land position as at 30 June 2024. Bounty's full schedule of tenements is included in Additional Information Required by the ASX Listing Rules at the end of this Annual Report.

Bounty projects not specifically referred to below in this Project Review are summarised in Bounty’s Quarterly Activity Reports released to the ASX during 2024 and on Bounty’s website: www.bountyoil.com.

Onshore Projects

Oil Business

SW Queensland – Cooper Basin

ATP 1189P Naccowlah Block and Associated PL’s - Bounty 2%; 10% in Watkins North 2

Location: 35 km southeast of Jackson

Production

During the year ended 30 June 2024, the company produced oil as a joint venture participant from oil fields and leases operated by Santos Limited in ATP 1189P, Naccowlah Block.

Bounty’s petroleum production (in barrels of oil equivalent - boe) and sales for the year ended 30 June 2024 are summarised in Table 3 below; in the Review of Operations and in the Directors Report.

Table 3		
Naccowlah Block Bounty Share (2% interest)	2024	2023
Revenue \$	\$1.61 million	\$1.77 million
Production (boe)	11,805	10,792

Production volumes sold were higher but with lower prices averaging \$A 119 per bbl revenue was slightly reduced.

Naccowlah Block - Exploration and Development

Background

Location: Surrounding Jackson, Naccowlah and Watson Oilfields

The Naccowlah Block consists of ATP 1189 and 23 petroleum leases totalling 1,794 square kilometres. The block contains Jackson, the largest onshore oilfield in Australia. There are significant production infrastructure and pipelines. The joint venture maintains an active drilling programme.

2023/24 Exploration and Development

Bounty participated in an NFE oil drilling program in the Watson -Watkins area of the Block (see Map). The program was completed using the Schlumberger SLR 188 Rig operated by Santos (see photo above). This continued an appraisal and NFE drilling program from prior periods based on blanket 3D seismic data.

Watkins North 1 and Watkins North 2 in Petroleum Lease 35 were drilled as vertical NFE’s in July - August 2023.

Good oil shows were recorded in mud logs in both wells over the target Formations and logging runs and pressure tests established good reservoir in the oil productive middle Birkhead/GC 30 horizon. The

two wells were cased and tied in to pipelines through the Watson Field oil satellite and production facilities in late 2023.

These two additional discoveries further extended the productive middle Birkhead/GC 30 sands 2 km north of the Watkins Field and have further developed the Watkins/Watson North complex.

Walter 1 seeking to extend the Watson South Field further west encountered weak oil shows at the target Birkhead/GC 30 horizon and after logging was P & A'd.

Bounty anticipates that following project reviews the operator will undertake further exploration/appraisal drilling in Naccowlah Block in 2025.

Results of the July 2023 – August 2023 campaign are summarised below:

Date	Well	Bounty Interest %	Formation/Oil recoveries	Result
July -August 2023	Watkins North 1	2 %	Good oil in middle Birkhead/GC 30 Formation sands	C&S as potential oil producer
August 2023	Watkins North 2	10 %	Good oil in middle Birkhead/GC 30 Formation sands	C&S as potential oil producer
August 2023	Walter 1	2 %	Fair to poor oil shows in Birkhead/GC 30 Formation sands	P&A

Abbreviations

C&S well cased and suspended for oil production
P&A well plugged and abandoned
NFE near field oil exploration well

Oil Reserve and Resources Increases

As a result of the Watkins North 2023 campaign and other work Bounty achieved a material increase in its share of 2P/3P oil reserves/resources in the Block and increased production volumes.

SE Queensland - Surat Basin Oil Development

Petroleum Lease 2 Alton (PL 2), PL 46 Fairymount – see Maps below.

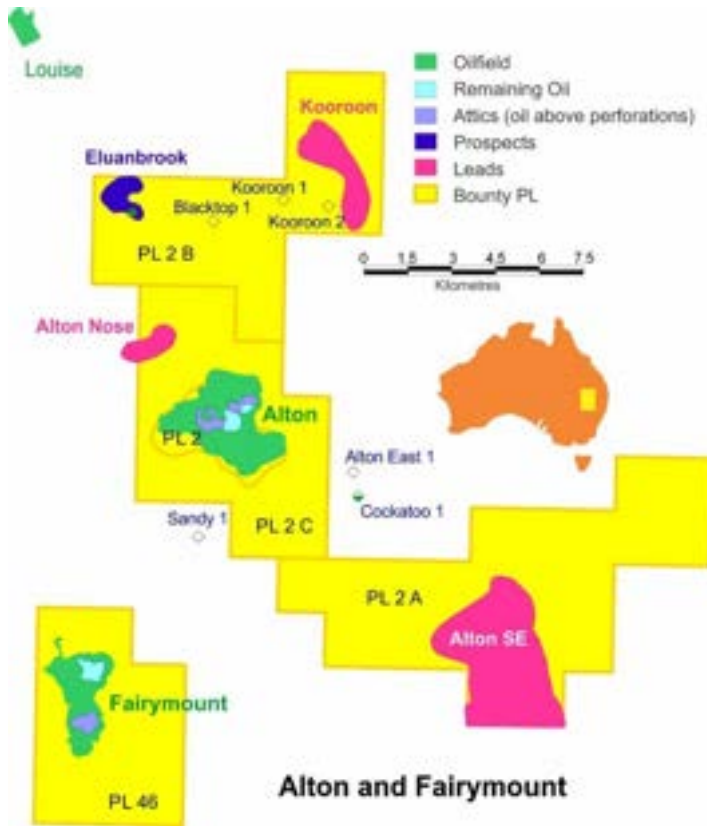

Location: 70 km. East of St George SE Queensland.

Background

Bounty's interests in the Surat Basin are Petroleum Lease (PL) 2 Alton and PL 46 Fairymount. In these two Leases Bounty is targeting around 445,000 bbls of oil in proven reservoirs.

In the southern Surat Basin hydrocarbons are generated in the Permian sequence and are liquids rich. In PL 2 oil is trapped primarily in the Jurassic age Evergreen Formation but also does occur in the underlying Precipice and Showgrounds Sandstones. In PL 46 oil is predominantly in the Triassic age Showgrounds Formation.

PL 2 Alton – Bounty 87.5% to 100%

PL 2 (Alton Field) has to date produced over 2 million barrels of oil from the Jurassic Age Evergreen Formation. Bounty has established through decline analysis that 1P reserves of 48,000 bbls can be recovered from the existing wells. The Alton oilfield also has two attic targets totalling 289,000 bbls at P50 in addition to the 48,000 bbls of oil remaining behind perforations. Eluanbrook, a proven oilfield in the northwest section of PL2 offers an up dip drilling opportunity of P50 88,000 bbls with an upside of 50,000 bbls in proven sands.

PL 46 Fairymount – Bounty 100%

Background

Post balance date Bounty has completed the acquisition of Petroleum Lease 46; 6 km southeast of PL 2 Alton and it now has access to oil production facilities, workshops and camp at PL46.

PL46 has to date produced 1.2 MMbo, and it has 48,000 bbls of proven reserves available behind perforations in existing wells. The wells are all equipped to resume production.

2024 Activities

Bounty has completed new reservoir studies and re-evaluated all the seismic and well data from PL46. Decline analysis revealed recoverable oil available from Fairymount 3 and Fairymount 8 of 48,000 bbls with an upside of a possible additional 46,000 bbls depending on the level of the oil water contact. In the northern part of the field there is a P50 resource of an additional 36,000 bbls for total resources of 140,000 bbls of light oil.

related compliance work.

Future Plans

Bounty is planning to commence oil production at Alton in 2025. Initial workovers on PL2 and PL46 will provide additional light oil production which will be processed at the PL46 facility.

This is expected to generate additional oil revenue of up to \$1 million per annum with significant upside from four undrilled attic locations identified by the 2024 seismic and reservoir studies. Bounty will later move to enhanced recovery and later an appraisal well at the Eluanbrook prospect located in PL 2.

Onshore Carnarvon Basin, Western Australia

Production Licence PL L16 – Bounty 100%

Location: Surrounding Rough Range Oil Field, 50 Km south of Exmouth, Carnarvon Basin WA

Background

During the period Bounty continued well integrity monitoring on the Rough Range 1B well in Petroleum Licence L 16 and was awaiting approval of an environmental plan to commence other remediation at the Rough Range.

Future Work

The principal undrilled prospect is the 3 million bbl potential Bee Eater prospect in the southern section of L 16.

Bounty continues to review the seismic and geological database seeking methods to image oil pools directly; given the relatively shallow 1100 metre depth to targets. After developing a method to de-risk the data Bounty intends conducting a drill test of the Bee Eater prospect.

Australian Offshore Review – Major Gas Exploration Growth Projects

PEP 11 - Offshore Sydney Basin, New South Wales – Bounty 15%

Map showing PEP-11 Permit, with declared wind energy development area (Declared Area)

Location of Planned Seablue-1 well ● and
Area of highest prospectivity in PEP-11 ○

Background and Petroleum Setting

PEP 11 covers 4,576 sq. km immediately adjacent to the largest gas market in Australia and is a high impact exploration project (see Location below). PEP 11 remains one of the most significant untested gas plays in Australia. The PEP 11 JV has demonstrated considerable gas generation and migration in the offshore Sydney Basin, with the previously observed mapped prospects and leads being highly prospective for gas. In 2010 it drilled New Seaclem 1 and demonstrated capacity to drill in this permit.

A 200km 2D seismic survey was completed in March 2018 in the area of the Baleen prospect and with AVO analysis further refined the Baleen target located 40 km southeast of Newcastle.

Joint Venture's focus is now on a drill test of Baleen where AVO (Amplitude versus Offset) analysis has defined an anomaly in the prospective Early to Mid-Permian sequence. The marine sands of the sequence are the targets especially further seawards where the sands can be expected to have good reservoir characteristics. Following on from the Federal Court quashing the decision to cancel the licence in 2023, the Joint Venture's application for a variation and extension to drill Seablue 1 targeting the Baleen Prospect has yet to be finalised by NOPTA or the Joint Authority and new Federal Court proceedings have been commenced by the operator.

Activities during the Year

A detailed statement on the status of this project is included in the CEO's Review and the Director's Report.

Jacobson (Cerberus) Project Offshore Carnarvon Basin WA

EP 475, 490, 491 and TP/27 - Bounty Earning 25%

Jacobson Project - Main Points

The four Jacobson Permits; offer a large number of oil and gas prospects and leads, many drill ready, with high case prospective resources of over 600 million barrels.

At 30 June 2024 Bounty had advanced and incurred \$722,000 towards this project and is entitled to earn a 25% interest in the Jacobson Permits by contributing \$ 5.5 million as a share of drill expenses. In 2022; Bounty exercised an option to earn additional equity up to a total of 50% of the four Permits by contributing an additional \$9 million to drill expenses. All drill expense contributions by Bounty are conditional upon the operator Coastal Oil and Gas Pty Ltd (Coastal) funding its share of drilling expenses.

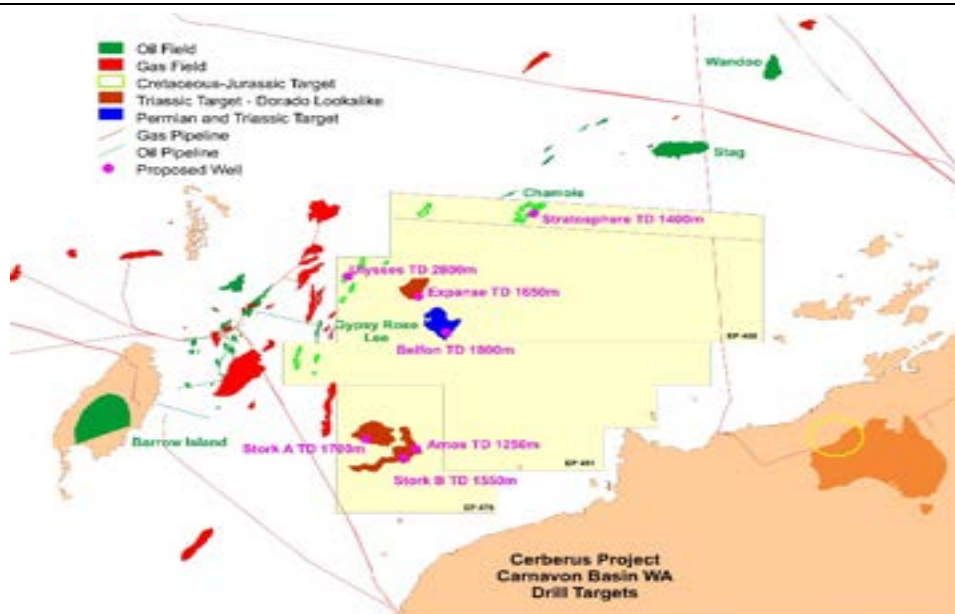

The Farmin Agreement (FIA) with Coastal continues. Bounty has registered the Agreement and the option exercise against the key Jacobson Permits.

2024 Activities - Jacobson

During the year Bounty assisted in obtaining extensions of the Permit terms and suspensions of the current work programs. Subject to extensions it committed to its share of the drill expenses. DEMIR's the West Australian regulator is considering the applications to extend the Permits and offshore rigs are available in Southeast Asia.

The estimated cost of the drilling program, is between US \$20 - 30 million for 2 wells; however rig day rates are in a state of flux due to uncertainty on Government policy. The parties continue to monitor the rig market for timing and cost.

Post balance date the operator undertook a \$300,000 seismic re-processing project and was expecting to receive extensions of the Permits from DEMIR's the West Australian regulator. The Permits are in good standing.

Jacobson Project

Exploration Rationale - Background

The Jacobson Project incorporates 3,578 km² in the four permits - EP 475, 490, 491 and TP 27 offshore Carnarvon Basin and lies 70 km. east of Barrow Island. It is right in the heart of Australia's most active oil production area and offers several prospects and leads

The project is principally targeting oil in a lower Triassic source rock and reservoir sequence at the base of the Locker Shale, in lookalikes to the highly successful Dorado Project (2C reserves of 344 MMboe) being developed by Santos Limited and Carnarvon Petroleum Ltd in the Browse Basin to the northeast.

The attraction of this area is twofold, excellent prospective volumes offering reserves greater than Bounty's onshore projects, and shallow water jack up drilling with abundant opportunities to achieve economies of scale by participating in drilling groups, resulting in costs only a few times more than onshore but with huge rewards.

Targets

Bounty is targeting several oil plays in particular:

1. Dorado discovery lookalikes in the same Lower Triassic sequence as Dorado (344 MMboe 2C), Phoenix South and ROC (78 MMboe 2C) discoveries in the Browse Basin to the northeast.
2. Stag (85 MMbo) and Wandoo (100 MMbo) lookalikes in identical pinchouts in the same Lower Cretaceous sand package.
3. Oil targets in Jurassic rocks along trend from proven oil fields at Chamois and Gypsy-Rose-Lee; and
4. Multi TCF natural gas targets in the deeper Permian sequences.

CORPORATE GOVERNANCE STATEMENT

Bounty Oil and Gas NL's Corporate Governance Statement is on its website www.bountyoil.com and has been released to the ASX.

DIRECTORS' REPORT

Your directors present their report on the consolidated entity Bounty Oil & Gas NL (“Bounty,” “company” or “the group”) being the company and its controlled entities for the financial year ended 30 June 2024.

Directors

The names of the directors in office at any time during or since the end of the financial year are: -

- Graham C Reveleigh (Independent Chairman)
- Charles Ross (Non-executive Director)
- Sachin Saraf (Executive Director)

Company Secretary

The following persons held the position of company secretary and chief financial officer of the group during the financial year:

- Sachin Saraf

Principal Activities

The principal activity of the company and the group during the financial year was that of exploration for, development, production and marketing of oil and gas (petroleum). Investment in listed entities is treated as a secondary activity and business segment.

There were no significant changes in the nature of the company’s principal activities during the financial year.

Operating Results

Operating loss of the group attributable to equity holders for the financial year ended 30 June 2024 amounted to \$0.93 million (see comparative details below).

	Consolidated FY 2024	Consolidated FY 2023
	\$ million	\$ million
Profit/(loss) from ordinary activities before income tax	(0.93)	(2.91)
Income tax attributable to loss	-	-
Net profit/(loss) after income tax	(0.93)	(2.91)

Revenue from continuing operations for the period was \$1.61 million down 9% on the previous year (2023: \$1.77 million) primarily due to reduced oil prices.

The operating loss was determined after taking into account the following material items:

- Petroleum revenue: of \$1.61 million
- Direct petroleum operating expenses of \$0.92 million
- Employee benefits expense of \$0.54 million
- Non-cash provision for:
 - Rehabilitation of oil and gas assets of \$0.33 million
 - Amortisation and depreciation expenses of \$0.32 million

Details of drilling activity, exploration and development operations and cash flows for the year ended 30 June 2024 have been reported by the company to the Australian Securities Exchange in the Quarterly Activity Report and Appendix 5B for each of the quarters during the year and in additional announcements on particular items.

A summary of revenues and results of significant business and geographical segments is set out in Note 4 to the Financial Statements. Brief details of production and other operations are set out below:

Review of Operations

Production & Sales:

During the year ended 30 June 2024, the company produced oil as a joint venture participant from several oil fields and leases operated by Santos Limited in ATP 1189P, Naccowlah Block, SW Queensland.

Petroleum revenue and production in barrels of oil equivalent (boe) are summarised below: -

Naccowlah Block Bounty Share (2% interest)	2024	2023
Totals		
Revenue \$	\$1.61 million	\$1.77 million
Production boe	11,805	10,792

Exploration and Development

Significant exploration and development operations during the year under review were:

Australia

Onshore

Cooper Basin, South-western Queensland

ATP 1189P Naccowlah Block; SW Queensland and Petroleum Leases:

- Bounty's Naccowlah Block reserves and resources are independently assessed at 31 December each year.
- Bounty's share of Block 2P & 2C developed reserves (proved, producing and contingent) at 31 December 2023 were: 0.159 mmbbls (159,000 bbls).
- Bounty's share of 3P reserves in the Block was 0.272 mmbbls (272,000 bbls).
- The JV drilled 3 exploration/NFE wells during the period.
- Additional contingent reserves are waiting development drills.

During the period commencing in August 2023 Bounty participated in each of three wells – Watkins North 1 & 2 which discovered new oil pools. Both wells were cased and completed ready for production and later in the period were tied in to the Watson Facilities. They added to oil sales during the period. Bounty participated at 10% in Watkins North 2.

In addition, Bounty continued to invest in oil development in the Block with an emphasis on delineating new targets, production optimisation, infrastructure and compliance. Oil volumes were lower in financial year 2024

Tie-ins to new reserves proved this year and oil prices above USD\$80/bbl (A\$ 135) have provided confidence for new drills which are being planned for 2025.

Surat Basin; Eastern Queensland***Petroleum Leases 2 and 46 Alton Area***

- Bounty continued detailed planning and compliance activities to re-commence oil production from shut in wells in PL 2 Alton and PL 46 Fairymount in 2024/2025 initially by producing oil from the Triassic age Evergreen Reservoirs at Alton and the Middle Triassic Showgrounds Formation in PL 46.
- Bounty continued work on the Well Integrity and Environmental Management Systems and undertook environmental monitoring.
- At PL 2 and PL 46 Alton Bounty group holds; developed reserves of 201,000 bbls 2P contingent reserves in the early Triassic age Basal Evergreen reservoir plus a potential 1.136 million bbls of 2P resources located in the three sands of the Boxvale/Evergreen Formations.
- There is also an estimated recoverable resource of around 150,000 bbls in the Middle Triassic Showgrounds Sandstone reservoir at the Eluanbrook Prospect within that part of PL 2 Alton known as the Kooroon JV.
- Bounty continued detailed studies and seismic re-mapping aimed at exploiting proven oil in the Showgrounds Formation at PL 46 Fairymount.

Carnarvon Basin, Western Australia

Location: Offshore 70 km. East of Barrow Island WA

Titles: EP 475, 490 and 491, TP 27 (Cerberus Permits) totalling 3,759 km²

Background:

On 7 October 2021 Bounty entered a farmin agreement with Coastal Oil and Gas Pty Ltd (“Coastal”) to earn a 25% interest in this shallow water oil project, offshore Carnarvon Basin, West Australia by contributing \$500,000 to seismic data acquisition, interpretation and drill planning. Bounty contributed an additional \$100,000 to assist the project in 2022 Subject to Coastal confirming funding for the balance drilling expenses and fixing drilling targets Bounty will then contribute \$5.5 million to drilling expenses to earn its interest in the four Cerberus Permits. The project is right in the heart of Australia’s most active oil and gas production areas and offers a large number of prospects and leads, many drill ready, with high case prospective resources of over 600 million barrels.

Activities in 2024

As a result of its contributions on 6 April 2022, Bounty exercised an option to earn additional equity up to a total of 50% of the four Jacobson Permits by contributing an additional \$9 million to drill expenses. Bounty has registered the notice of exercise of option against the two southernmost Permits WA EP474 and WA EP 491. Further capital contributions are conditional upon certain milestones.

At 30 June 2024 Bounty had contributed \$735,000 pursuant to the farmin agreement and to other expenditure. During the period, EP 490, EP 491 and TP/27 had further extensions of the permit terms and suspensions of the current work program and terms approved by the West Australia state regulator DEMIRS.

The prospective EP475 permit (EP475) was also extended during the period.

DEMIRS is considering further extensions contingent on a firm drill commitment from Bounty and Coastal.

Discussions with the operator on funding and possible re-structuring of the Bounty FIA continued up to June 2024.

All Annual Reports have been filed and re-processing of 2D seismic data completed. The Permits are in good standing.

Location: Onshore Carnarvon Basin, 40km south of Exmouth WA**Petroleum Licence L 16 Rough Range**

- During the period the group continued well integrity monitoring on the Rough Range 1B well in Petroleum Licence L 16 onshore Carnarvon Basin and other remediation at the Rough Range Oilfield.
- At the end of the period Bounty was making amendments to an updated Environment Plan under consideration by the regulator; DMIR's. Bounty continued to seek a route to further refine the structure and reservoir in L16 with a view to further seismic surveys and/or an exploration well.

Offshore**Sydney Basin, New South Wales****Location: Offshore Newcastle Region, NSW****Title: PEP 11 - 4,576 km² Bounty 15% interest****Background:**

In 2020, Asset Energy Pty Limited (Asset Energy) as the PEP 11 Joint Venture operator lodged 2 applications for a variation and suspension of the conditions of PEP 11 (the Applications) and in December 2021 the Federal Government (via the Commonwealth - New South Wales Offshore Petroleum Joint Authority (Joint Authority) announced that it would refuse the Applications; that PEP 11 would not be extended and gave formal notice thereof in March 2022. The operator Asset Energy commenced proceedings in the Federal Court of Australia (Proceedings) (WAD106/2022). The proceedings challenged the decision to refuse the Applications and to decline a related grant of an extension of term. On 14 February 2023 the Federal Court of Australia ordered:

- The decision of the Joint Authority to reject Asset's applications is set aside;
- The decision of the Joint Authority is now to be remade according to law.

The matter then reverted to NOPTA for re-consideration and in 2023; Bounty and Asset Energy filed additional material with NOPTA in support of the Applications including a commitment to drill an exploration well for natural gas.

Activities in 2024

After the end of the period with no decision by the Joint Authority the operator commenced new proceedings in the Federal Court of Australia seeking orders that NOPTA make a decision on the applications. On 18th September 2024 the Federal Minister for Industry and Science made a statement that he had carefully considered the PEP-11 Exploration Permit Applications; formed a preliminary view that the Applications should be refused and gave the parties (including Bounty) 30 days to make submissions before any final decision. Bounty intends to make submissions and otherwise take such steps as may be advised to preserve PEP 11 and preserve its rights as on of the registered holders.

Accordingly, at the end of the period and at the date of this report the above conditions continue to indicate a material uncertainty that may affect the ability of Bounty to realise the carrying value of \$0.60 million for its interest in the PEP 11 exploration permit in the ordinary course of business – see Note 2(k) Exploration and Evaluation Expenditure in the notes to the Consolidated Financial Statements comprising the Full-Year Report.

Other Properties

During the period, Bounty continued to fund exploration and development expenditure in connection with its operated and joint venture interests located in Queensland and Western Australia. Its participation in the Naccowlah Block drilling and in the Surat Basin is expected to provide additional oil revenue in 2025. Bounty is actively seeking additional material projects.

Corporate – Capital raising

On 16 January 2024, the Company issued 128 million ordinary shares with 1 free attaching listed option (ASX code: BUYO) via a share placement at \$0.009 (0.9 cent) to raise \$ 1.152 million before issue expenses. The shares were allotted pursuant to the Company's placement capacity under ASX listing rule 7.1 and 7.1A. A further 10 million listed options were issued to the Broker involved in the Placement.

The Issue Price of \$0.009 a share represented an 18.2% discount to the last trading price of \$0.011; and a 14.2% discount to the 15-day VWAP of \$0.0105.

No further options have been issued during the year ending 30 June 2024 or up to the date of this report.

Accordingly, except as noted above at balance date on 30 June 2024 and at the date of this report, no unissued ordinary shares or securities of Bounty Oil & Gas NL or any other entity comprising the consolidated entity were under option. No ordinary shares of the company were issued pursuant to exercise of options during the year ending 30 June 2024.

Dividends

No dividends have been paid or declared for payment for the year ended 30 June 2024 and no dividend is recommended.

Financial Position

At 30 June 2024 current assets were \$1.78 million including cash of \$1.56 million.

During the financial year the company invested: -

- \$ 0.84 million on development and production facility primarily in ATP 1189P Naccowlah Block; Queensland to further develop and exploit its existing proved producing oil reserves and to increase its 2P oil reserves.
- \$ 0.10 million in petroleum exploration projects and acquisitions in Australia as summarised in the Review of Operations above.

The net assets of the group decreased marginally to \$5.82 million in the year ended to 30 June 2024 due to non-cash amortisation and depreciation charge on petroleum properties. The significant underlying movements resulted from the following items:

- Capitalised cost: \$0.94 million
- Net Current asset : (\$0.95 million)

The directors believe the group has a stable financial position to continue expansion of its primary operations.

Significant Changes in State of Affairs

There have been no significant changes in the state of affairs of the company during the financial year.

Contingent Liabilities and Contingent Assets

As at the date of this report, there were no contingent assets or liabilities.

There was no litigation against or involving the parent entity Bounty Oil & Gas NL.

Events after the Reporting Period

No matters or circumstances have arisen since the end of the financial year which have significantly affected or may significantly affect the operations of the company, the results of those operations, or the state of affairs of the company in future financial years, other than those referred to in note 27.

Future Developments, Prospects and Business Strategies

Subject to the amount of its ongoing oil revenues and the availability of new capital; consistent with that income and the available cash reserves of the group, Bounty will continue:

- Production, development and exploration for oil and natural gas (petroleum).
- Expand in the business of the exploration for, development of and production of petroleum.
- To conduct such operations principally in Australia.

In the coming year the group will focus on the: -

- Development of its existing oil and gas reserves in the Cooper Basin and in the Surat Basin, Queensland aimed at increasing group oil and gas revenue;
- Financing and preparation to fund and earn a minimum 25% interest in the Jacobson (Cerberus) Permits, Carnarvon Basin; WA and to fund its 15% share and to drill its major offshore gas target in PEP 11, Sydney Basin;
- Acquisition of additional petroleum properties with existing petroleum production or reserves and resources considered to have potential to develop and/or produce petroleum within an acceptable time frame; and
- Development of new business opportunities focused on material Australian drill opportunities and projects.

Environmental regulations or Issues

The company's operations are subject to significant environmental regulation under the laws of the Commonwealth of Australia and its States and Territories in respect of its operated and non-operated interests in petroleum exploration, development and production. Its oil and gas production interests in the State of Queensland are operated by Santos Limited and Bounty group companies. Its non-operated offshore exploration operations in PEP 11, NSW are conducted by a competent operator; BPH Energy Limited. Bounty is a farminee to EP 475, 490 and 491, TP 27 (Jacobson (Cerberus) Permits), Western Australia operated by Coastal Oil & Gas Pty Ltd. Each of the operators and joint operator undertake operations in full compliance with all relevant environmental legislation of the Commonwealth of Australia and the relevant States. Bounty otherwise complies with all relevant environmental legislation.

Information on Directors

The names and particulars of the directors of the company during or since the end of the financial year ended 30 June 2024, are: -

Graham Reveleigh	—	<i>Non-Executive Director</i>
Qualifications	—	BSc. MSc, Fellow Aus IMM.
Experience	—	Mr Reveleigh is a professional geologist and has over 50 years' experience in the resources industry both in Australia and overseas. Early in his career, he worked in the oil industry, then spent most of his career in exploration, mine management and construction in the mineral industry. He has had extensive experience in petroleum as a director of Drillsearch Energy (now part of Beach Energy). He is a Fellow of the Australasian Institute of Mining and Metallurgy. He was appointed a director and chairman in 2005.
Special responsibilities:		Chairman of the company; geotechnical advice.
Charles Ross	—	<i>Non-Executive Director</i>
Qualifications	—	BSc.
Experience		Mr Ross has had extensive experience in the private and public equity and corporate finance market in North America and Euro zone of over 25 years. He has operated extensively in corporate asset acquisition and divestiture, review and development of corporate financing strategies, administration, compliance procedures and investor relations. He was a director of a subsidiary of ASX Listed Drillsearch Energy from 1992 to 2008 involved in most aspects of petroleum exploration, development and production operations in the Western Canada Basin and Australian areas. He was appointed a director in 2005.
Special responsibilities:		Audit reviews; corporate strategy.
Sachin Saraf	—	<i>Executive Director</i>
Qualifications	—	B.com (Hons.); PGD.Com; CPA.
Experience		Mr Saraf has been the Company Secretary and CFO of Bounty group since 2014. Prior to joining Bounty, he gained significant experience in finance roles with ASX listed Origin Energy and Drillsearch Energy since 2007. He was appointed a director in 2022.
Special responsibilities:		Company Secretary and CFO.

Directorships of other listed companies

	Directors' Meetings	
	Number eligible to attend	Number attended
Graham Reveleigh	9	9
Charles Ross	9	9
Sachin Saraf	9	9

The company does not have separate audit or remuneration committees.

REMUNERATION REPORT (audited)

The remuneration report, which has been audited, outlines the director and executive remuneration arrangements for the Company, in accordance with the requirements of the Corporations Act 2001 and its Regulations.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including all Directors.

The prescribed details for each person covered by this report are detailed below under the following headings:

- Director and senior management details
- Remuneration policy
- Non-executive directors policy
- Senior management personnel policy
- Remuneration of directors and key management
- Key terms and employment contracts

Directors and Key Management details

The term "key management" as used in this remuneration report to refers to the following directors and executives.

Directors

The following persons acted as directors of the company during or since the end of the financial year: -

- Mr Graham C Reveleigh (Chairman and Non-Executive Director)
- Mr Charles Ross (Non-Executive Director)
- Mr Sachin Saraf (Executive Director)

Executives

The following persons acted as senior management of the company during or since the end of the financial year:

- Mr Philip F Kelso (Chief Executive Officer)

The company does not consider other employees and consultants to be Key Management Personnel.

Remuneration policy

The remuneration policy of Bounty Oil & Gas NL has been designed to align key management personnel objectives with shareholder and business objectives by providing a fixed remuneration component and bonuses issued at the discretion of the board of the company. The board of Bounty Oil & Gas NL believes the remuneration policy to be appropriate and effective in its ability to attract and retain the best key management personnel to run and manage the company, as well as create goal congruence between directors, executives and shareholders.

All remuneration paid to key management personnel (directors and others) is valued at the cost to the company and expensed or where appropriate transferred to capital items. Shares issued to key management personnel are valued as the difference between the market price of those shares and the amount paid by the key management person. Share options are valued using the Black- Scholes methodology. Shares and options granted to key management personnel (directors and others) are subject to any necessary approvals required by the ASX Listing Rules.

Performance-based remuneration

Given the long-term nature of and risk variables involved in exploration and development of petroleum resource projects as compared to other sectors e.g. retail revenues; remuneration of directors or other key management personnel is not performance based.

Non-executive directors' policy

The board policy is to remunerate non-executive directors at market rates for time, commitment and responsibilities. The maximum aggregate amount of fees that can be paid to non-executive directors is within the maximum amount specified in the company's Constitution. Any increase of that amount is subject to approval by shareholders at the Annual General Meeting. Fees for non-executive directors are not linked to the performance of the company.

Remuneration of non-executive directors is determined by the Board exclusive of the director under consideration after considering the individual time commitment, duties and function of the subject Director. Further considerations of the amount of remuneration are made by referral to amounts paid to Directors, both executive and non-executive, by other listed entities of comparable size to the Company in the oil and gas exploration industry.

The board of directors as a whole determines the proportion of any fixed and variable compensation for each other key management person.

Any consulting fees payable to Directors as to specific projects outside the normal day to day duties of the Directors are agreed upon prior to commencement of work on the specific projects.

The company makes cash bonus payments to key directors from time to time. Bonus payments by way of share-based payments are made from time to time subject to any necessary shareholder approval. All such payments are expensed at the time of issue at the prevailing market price.

Each director is paid in cash. Shares and share options have on occasions been granted to directors as part of their remuneration.

Senior management personnel policy

The board's policy for determining the nature and amount of remuneration of key management personnel who are senior management executives of the company is as follows: -

The remuneration structure comprises a combination of, short term benefits including base fees and long-term incentives and is based on a number of factors, including length of service, particular experience of the individual concerned, and overall performance of the company. The contracts for service between the company and key executive management personnel are for fixed terms which may continue at the end of the term. There were no provisions for retirement benefits in contracts with senior management executives of the company made or continued during the year ended 30 June 2024.

The company may make cash bonus payments to senior management executives and to selected employees from time to time. Bonus payments and long-term incentives by way of share-based payments are classed as long-term incentives and are made from time to time subject to any necessary shareholder approval. All such payments are expensed at the time of issue at the prevailing market price.

Key management personnel who are employees receive a superannuation guarantee contribution required by the government and do not receive any other retirement benefits. Some individuals, however, may choose to sacrifice part of their salary to increase payments towards superannuation.

The chief executive officer, Mr Philip F Kelso, is engaged through a 2 year fixed term service agreement with a personally related entity containing the following material conditions:

- Management fees of \$180,000 per annum commencing from 1 July 2023.
- Payment of business travel, accommodation and parking.
- Bonuses at the discretion of the board of directors and there are no retirement or other fixed benefits.
- The personally related entity is responsible for all statutory entitlements.
- Services: To include non-exclusive executive management, capital raising, communication, management strategy, budgets, legal strategy, investment policy and all other duties normally incidental to the position of chief executive officer.

Other than the directors and the chief executive officer, at the date of this Report all other personnel are permanent or part time employees of the company and not classified as key management personnel.

Key Management Remuneration

Details of the remuneration of directors and the other key management personnel of the group (as defined in AASB 124 Related Party Disclosures) and the one highest paid executive of Bounty Oil & Gas N.L. are set out in the following tables.

2. Retired in September 2022
3. Appointed 19 September 2022

No director or senior management person appointed during the above periods received a payment as part of his consideration for agreeing to be appointed to that position.

Share-based payments

During the financial year ended 30 June 2024 no share-based payments were made to Key Management Persons.

Fully paid ordinary shares

No fully paid ordinary shares were issued to Key Management Persons during the period.

Share Options

1. No share options were issued to directors or other key management persons or executives as part of their remuneration during the year ended 30 June 2024 or since that date.
2. During the year, no directors or senior management held or exercised options that were granted to them as part of their compensation in previous periods.

Loan and advance transaction with directors and executives

No loans were made to key management personnel including their personally related entities during the financial year and no loans were outstanding at the end of the prior period. During the year the Company was advanced \$157,000 by a related entity of the CEO. The advance was repaid within 30 days along with interest disclosed in note 20(d).

Other Key Management Personnel Disclosures:

Further information on disclosure in connection with Key Management Personnel and Share Base Payments are set out in the following Notes to the Financial Statements: -

1. Note 19: Share Based Payments
2. Note 20: Key Management Personnel Disclosures
3. Note 22: Related Party Transactions.

Performance income as a proportion of total remuneration

Remuneration paid to directors and key management personnel during the financial year ended 30 June 2024 was not based on performance.

Employee Share Scheme

Bounty Oil & Gas N.L. does not have a current Employee Share Scheme approved by shareholders.

This concludes the remuneration report, which has been audited.

Indemnity and insurance of Officers and Auditors

During the financial year ended 30 June 2024 the company has not entered indemnity and access deeds with any of the directors indemnifying them against liabilities incurred as directors, including costs and expenses in successfully defending legal proceedings.

The Company has not otherwise, during or since the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor. During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the Company or any related entity.

Legal matters or Proceedings on behalf of Company

No person has applied for leave of Court to bring proceedings on behalf of the company or intervene in any proceedings to which the company is a party for the purpose of taking responsibility on behalf of the company for all or any part of those proceedings.

The company was not a party to any such proceedings during the reporting period.

Non-Audit Services

The independent auditor to the company has not provided non-audit services to the company during or after the end of the financial year.

Auditor's Independence Declaration

A copy of the auditor's independence declaration as required under section 307C of the Corporations Act 2001 is set out immediately after this Directors' report.

This report is made in accordance with a resolution of Directors, pursuant to section 306(3)(a) of the Corporations Act 2001.

Auditor

G.C.C Business & Assurance was appointed as Company's auditor in 2023 and continues in office in accordance with section 327 of the Corporations Act 2001

Rounding of Amounts

Bounty Oil & Gas N.L. is a type of Company that is referred to in ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191 and therefore the amounts contained in this report and in the financial report have been rounded to the nearest dollar.

Forward looking Statements

This Financial Report includes certain forward-looking statements that have been based on current expectations about future acts, events and circumstances. These forward-looking statements are, however, subject to risks, uncertainties and assumptions that could cause those acts, events and circumstances to differ materially from the expectations described in such forward-looking statements. These factors include, among other things, commercial and other risks associated with the meeting of objectives and other investment considerations, as well as other matters not yet known to the Company or not currently considered material by the Company. This report is made in accordance with a resolution of Directors, pursuant to section 298(2) (a) of the Corporations Act 2001.

Signed in accordance with a resolution of the Board of Directors made pursuant to s. 298(2) of the Corporations Act 2001.

On behalf of the Directors.

A handwritten signature in black ink, appearing to read 'Graham Reveleigh', is written over a light grey rectangular background.

Notes to the consolidated financial statements for the year ended 30 June 2024

1. Statement of compliance

Bounty Oil and Gas N.L. is a company incorporated in Australia and limited by shares which are publicly traded on the Australian Securities Exchange.

This financial report includes the consolidated financial statements and notes of Bounty Oil & Gas NL (“parent entity”) and controlled entities (“consolidated group” or “group”) and the Group’s interest in jointly controlled assets for the financial year ended 30 June 2024. Supplementary financial information about the parent entity is disclosed in Note 26. The Financial Statements are presented in Australian currency.

The group is a for-profit entity for financial reporting purposes under Australian Accounting Standards.

The financial report was authorised for issue by the directors on 26 September 2024.

The financial report is a general purpose financial report that has been prepared in accordance with Australian Accounting Standards, Australian Accounting Interpretations, other authoritative pronouncements of the Australian Accounting Standards Board (AASB), and the *Corporations Act 2001*.

Compliance with AASB 101 ensures compliance with International Financial Reporting Standard IAS 1 Presentation of Financial Statements.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in a financial report containing relevant and reliable information about transactions, events and conditions to which they apply. Compliance with Australian Accounting Standards ensures that the financial statements and notes also comply with International Financial Reporting Standards. Material accounting policies adopted in the preparation of this financial report are presented below. They have been consistently applied unless otherwise stated.

2. Summary of significant accounting policies

a. Basis of preparation

The consolidated financial statements have been prepared on the basis of historical cost, except for the revaluation of certain non-current assets and financial instruments. Cost is based on the fair values of the consideration given in exchange for assets. All amounts are presented in Australian dollars, unless otherwise noted.

The financial report is presented in Australian dollars and under the option available to the Group under ASIC Corporations (Rounding in Financial/Directors’ Reports) Instrument 2016/191, all values are rounded to the nearest dollar unless otherwise stated.

b. Adoption of new and amended Accounting Standards

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period. The consolidated entity has adopted all the new, revised or amended Accounting Standards and Interpretations issued by the AASB that are mandatory for the current reporting period beginning 1 July 2024.

The Directors have reviewed new accounting standards and interpretations that have been published that are not mandatory for 30 June 2024 reporting periods. As a result of this review, the Directors have determined that there is no material impact of the new and revised Standards and Interpretations on the Company and, therefore, no material change is likely to company accounting policies.

c. Basis of consolidation

(i) Controlled entities

The consolidated financial statements incorporate the assets, liabilities and results of entities controlled by Bounty Oil & Gas NL at the end of the reporting period. A controlled entity is any entity over which Bounty Oil & Gas NL has the power to govern the financial and operating policies so as to obtain benefits from the entity’s activities. Control will generally exist when the parent owns, directly or indirectly through subsidiaries, more than half of the voting power of an entity. In assessing the power to govern, the existence and effect of holdings of actual and potential voting rights are also considered.

Where controlled entities have entered or left the Group during the year, the financial performance of those entities are included only for the period of the year that they were controlled. A list of controlled entities is contained in Note 24 to the financial statements.

Notes to the consolidated financial statements for the year ended 30 June 2024

c. Basis of consolidation (continued)

In preparing the consolidated financial statements all inter-group balances and transactions between entities in the consolidated group have been eliminated on consolidation. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with those adopted by the parent entity.

For the reporting period the only controlled entities that Bounty Oil & Gas NL had were Ausam Resources Pty Ltd.(100%), Interstate Energy Pty Ltd. (100%), Rough Range Pty Ltd. (100%), and Australian Oil Company No. 3 Pty Ltd. (100%).

(ii) Joint arrangements

Under AASB 11 'Joint Arrangements' investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations each investor has, rather than the legal structure of the joint arrangement. Bounty Oil & Gas NL has assessed the nature of its joint arrangements and determined them to be joint

Bounty Oil & Gas NL has recognised its share of jointly held assets, liabilities, revenues and expenses of joint operations. These have been incorporated in the financial statements under the appropriate headings. Details of the joint operations are set out in note 25.

(iii) Business combinations

The Group applies the acquisition method in accounting for business combinations. The consideration transferred by the Group to obtain control of a subsidiary is calculated as the sum of the acquisition-date fair values of assets transferred, liabilities incurred and the equity interests issued by the Group, which includes the fair value of any asset or liability arising from a contingent consideration arrangement. Acquisition costs are expensed as incurred.

The Group recognises identifiable assets acquired and liabilities assumed in a business combination regardless of whether they have been previously recognised in the acquiree's financial statements prior to the acquisition. Assets acquired and liabilities assumed are generally measured at their acquisition-date fair values.

Goodwill is stated after separate recognition of identifiable intangible assets. It is calculated as the excess of the sum of: (a) fair value of consideration transferred, (b) the recognised amount of any non-controlling interest in the acquiree, and (c) acquisition-date fair value of any existing equity interest in the acquiree, over the acquisition-date fair values of identifiable net assets. If the fair values of identifiable net assets exceed the sum calculated above, the excess amount (i.e., gain on a bargain purchase) is recognised in profit or loss immediately.

d. Interests in joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

When a group entity undertakes its activities under joint operations, the Group as a joint operator recognises in relation to its interest in a joint operation:

- its assets, including its share of any assets held jointly;
- its liabilities, including its share of any liabilities incurred jointly;
- its share of the revenue from the sale of the output by the joint operation; and
- its expenses, including its share of any expenses incurred jointly.

The Group accounts for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the AASBs applicable to the particular assets, liabilities, revenues and expenses. When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a sale or contribution of assets), the Group is considered to be conducting the transaction with the other parties to the joint operation, and gains and losses resulting from the transactions are recognised in the Group's consolidated financial statements only to the extent of other parties' interests in the joint operation.

e. Income tax

The income tax expense / (income) for the year comprises current income tax expense / (income) and deferred tax expense (income).

Current income tax expense charged to the profit or loss is the tax payable on taxable income calculated using applicable income tax rates enacted, or substantially enacted, as at reporting date. Current tax liabilities (assets) are therefore measured at the amounts expected to be paid to (recovered from) the relevant taxation authority.

Notes to the consolidated financial statements for the year ended 30 June 2024

e. Income tax

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the year as well as unused tax losses.

Deferred tax assets and liabilities are ascertained based on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax assets also result where amounts have been fully expensed but future tax deductions are available. No deferred income tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Current and deferred income tax expense / (income) is charged or credited directly to equity instead of the profit or loss when the tax relates to items that are credited or charged directly to equity.

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates enacted or substantively enacted at reporting date. Their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability.

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of deferred tax asset can be utilised.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates, and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where a legally enforceable right of set-off exists, the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

Tax Consolidation - Bounty Oil & Gas NL and its wholly owned Australian subsidiary have not formed an income tax consolidation group under tax consolidation legislation. Each entity in the Group recognises its own current and deferred tax assets and liabilities. Such taxes are measured using the 'stand alone taxpayer' approach to allocation.

f. Fair value measurement

AASB 13 establishes a single source of guidance for determining the fair value of assets and liabilities. AASB 13 does not change when an entity is required to use fair value, but rather, provides guidance on how to determine fair value when fair value is required or permitted. Application of this definition may result in different fair values being determined for the relevant assets. AASB 13 also expands the disclosure requirements for all assets and liabilities carried at fair value. This includes information about the assumptions made and the qualitative impact of those assumptions on the fair value determined. Consequential amendments were also made to other standards.

AASB 13 requires the disclosure of fair value information by level of the fair value hierarchy, which categorises fair value measurements into one of three possible levels based on the lowest level that a significant input to the measurement can be categorised into as follows:

- level 1: Measurement based on quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.

-level 2: Measurements based on inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly.

-level 3: Measurements based on unobservable inputs for the asset or liability.

The carrying values of financial assets and liabilities recorded in the financial statements approximates their respective fair values, determined in accordance with the accounting policies described above and adjusted for capitalised transaction costs, if any.

Notes to the consolidated financial statements for the year ended 30 June 2024

g. Going concern basis

The directors have prepared the financial report on a going concern basis, which contemplates the continuity of normal business activities and the realisation of assets and the settlement of liabilities in the ordinary course of business.

For the period ended 30 June 2024, the Group realised a net loss after tax of \$926,061 (2023: \$2,911,189). The net cash spent on operating activities for the period ended 30 June 2024 was \$327,971 (2023: net cash spent \$1,144,344). The Group's net asset position at 30 June 2024 was \$5,824,702 (30 June 2023: \$5,627,990) and an excess of current liabilities over current assets of \$1,095,466 (30 June 2023: \$147,766) as at 30 June 2024.

The directors' cash flow forecasts project that the group will continue to be able to meet its liabilities and obligations (including those exploration commitments as disclosed in Note 21) as and when they fall due for a period of at least 12 months from the date of signing of this financial report. The cash flow forecasts are dependent upon the generation of sufficient cash flows from operating activities to meet working capital requirements; contemplating issue of equity by the Group; the ability of the Group to manage discretionary exploration and evaluation expenditure on non-core assets via farmout or disposal of certain interests and or a reduction in its future work programmes. The directors are of the opinion that the use of the going concern basis of accounting is appropriate as they are satisfied as to the ability of the Group to implement the above.

h. Trade and other receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost, less provision for doubtful debts. Trade receivables are due for settlement no more than 30 days. Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

Impairment

Allowances for impairment are recognised using an 'expected credit loss' ('ECL') model. Impairment is measured using a 12-month ECL method unless the credit risk on a financial instrument has increased significantly since initial recognition in which case the lifetime ECL method is adopted.

Collectability of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectable are written off by reducing the carrying amount directly.

i. Property, plant and equipment

Each class of property, plant and equipment is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the Plant and equipment are measured on the cost basis.

The carrying amount of plant and equipment is reviewed annually by directors to ensure it is not in excess of the recoverable amount from these assets. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the asset's employment and subsequent disposal.

The cost of fixed assets constructed within the consolidated group includes the cost of materials, direct labour, borrowing costs and an appropriate proportion of fixed and variable overheads.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of profit and loss during the financial period in which they are incurred.

j. Depreciation

The depreciable amount of all property, plant and equipment including buildings and capitalised lease assets, but excluding freehold land, is depreciated on a straight-line basis over the asset's useful life to the Group from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

Depreciation on assets is calculated over their estimated useful life as follows:

Class of Fixed Asset	Estimated useful life
Plant and equipment	5 years
Computer equipment	4 years
Office furniture and fittings & other	5 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are included in the statement of profit and loss. When re-valued assets are sold, amounts included in the revaluation reserve relating to that asset are transferred to retained earnings.

Notes to the consolidated financial statements for the year ended 30 June 2024

k. Exploration and evaluation expenditure

Exploration and evaluation expenditures in relation to each separate area of interest are recognised as an exploration and evaluation asset in the year in which they are incurred where the following conditions are satisfied:

- the rights to tenure of the area of interest are current; and,
- at least one of the following conditions is also met:

i) the exploration and evaluation expenditures are expected to be recouped through successful exploration, development and commercial exploitation of the area of interest, or alternatively, by its sale; or,

ii) exploration and evaluation activities in the area of interest have not, at the reporting date, reached a stage which permits a reasonable assessment of the existence or otherwise of economically recoverable petroleum reserves or resources and active and significant operations in, or in relation to, the area of interest are continuing.

Exploration and evaluation assets are initially measured at cost and include acquisition of rights to explore, geophysical surveys, studies, exploratory drilling, sampling and associated activities and an allocation of depreciation and amortisation of assets used in exploration and evaluation activities. General and administrative costs are only included in the measurement of exploration and evaluation costs where they are related directly to operational activities in a particular area of interest.

Exploration and evaluation assets are assessed for impairment when facts and circumstances suggest that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount. The recoverable amount of the exploration and evaluation asset (or the cash-generating unit(s) to which it has been allocated, being no larger than the relevant area of interest) is estimated to determine the extent of the impairment loss (if any). Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in previous years. Where a decision is made to proceed with development in respect of a particular area of interest, the relevant exploration and evaluation asset is tested for impairment and the balance is then re-classified to development.

PEP 11 - Offshore Newcastle Region, NSW Bounty 15% interest (PEP 11) - Material Uncertainty

In 2020, Asset Energy Pty Limited (Asset Energy) as the PEP 11 Joint Venture operator lodged 2 applications for a variation and suspension of the conditions of PEP 11 (the Applications) and in December 2021 the Federal Government (via the Commonwealth - New South Wales Offshore Petroleum Joint Authority (Joint Authority) announced that it would refuse the Applications; that PEP 11 would not be extended and gave formal notice thereof in March 2022. The operator Asset Energy commenced proceedings in the Federal Court of Australia (Proceedings) (WAD106/2022). The proceedings challenged the decision to refuse the Applications and to decline a related grant of an extension of term. On 14 February 2023 the Federal Court of Australia ordered:

- The decision of the Joint Authority to reject Asset's applications is set aside;
- The decision of the Joint Authority is now to be remade according to law.

The matter then reverted to NOPTA for re-consideration and in 2023; Bounty and Asset Energy filed additional material with NOPTA in support of the Applications including a commitment to drill an exploration well for natural gas.

Activities in 2024

After the end of the period with no decision by the Joint Authority the operator commenced new proceedings in the Federal Court of Australia seeking orders that NOPTA make a decision on the applications. On 18th September 2024 the Federal Minister for Industry and Science made a statement that he had carefully considered the PEP-11 Exploration Permit Applications; formed a preliminary view that the Applications should be refused and gave the parties (including Bounty) 30 days to make submissions before any final decision. Bounty intends to make submissions and otherwise take such steps as may be advised to preserve PEP 11 and preserve its rights as on of the registered holders.

Accordingly, at the end of the period and at the date of this report the above conditions continue to indicate a material uncertainty that may affect the ability of Bounty to realise the carrying value of \$0.60 million for its interest in the PEP 11 exploration permit in the ordinary course of business – see Note 2(k) Exploration and Evaluation Expenditure in the notes to the Consolidated Financial Statements comprising the Full-Year Report.

Notes to the consolidated financial statements for the year ended 30 June 2024

I. Production and development assets

The group follows the full cost method of accounting for production and development assets whereby all costs, less any incentives related to the acquisition, exploration and development of oil and gas reserves are capitalised. These costs include land acquisition costs, geological and geophysical expenses, the costs of drilling both productive and non productive wells, non producing lease rentals and directly related general and administrative expenses. Proceeds received from the disposal of properties are normally credited against accumulated costs.

When a significant portion of the properties are sold, a gain or loss is recorded and reflected in profit or loss.

With respect to production assets, depletion of production and development assets and amortisation of production facilities and equipment are calculated using the unit of production method based on estimated proven oil and gas reserves. For the purposes of depletion calculation proved oil and gas reserves before royalties are converted to a common unit measure.

The estimated costs for developing proved underdeveloped reserves, future decommissioning and abandonments, net of estimated salvage values, are provided for on the unit of production method included in the provision for depletion and amortisation.

In applying the full cost method of accounting, the capitalised costs less accumulated depletion are restricted from exceeding an amount equal to the estimated discounted future net revenues, based on year end prices and costs, less the aggregate estimate future operating and capital costs derived from proven and probable reserves.

Development expenditure is recognised at cost less accumulated amortisation and any impairment losses. Where commercial production in an area of interest has commenced, the associated costs together with any forecast future capital expenditure necessary to develop proved and probable reserves are amortised over the estimated economic life of the field on a units-of-production basis.

Changes in factors such as estimates of proved and probable reserves that affect unit of production calculations are dealt with on a prospective basis.

m. Trade and other payables

These amounts represent liabilities for goods and services provided to the Group prior to the end of the financial year, which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition.

n. Inventories

Inventories are measured at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business less any estimated selling costs. The cost of petroleum products includes direct materials, direct labour and an appropriate portion of variable and fixed overheads.

o. Leases

When a contract is entered into, the Group assesses whether the contract contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group separates the lease and non-lease components of the contract and accounts for these separately.

The Group allocates the consideration in the contract to each component on the basis of their relative stand-alone prices.

Leases as a lessee

Right-of-use assets and lease liabilities are recognised at commencement date of the lease when the asset is available for use.

Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received.

Right-of-use assets are depreciated using the straight-line method over the shorter of their useful life and the lease term.

Periodic adjustments are made for any re-measurements of the lease liabilities and for impairment losses, assessed in accordance with the Group's impairment policies.

Lease liabilities are initially measured at the present value of future lease payments, discounted using the Group's incremental borrowing rate if the rate implicit in the lease cannot be readily determined. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. Lease payments are fixed payments or index-based variable payments incorporating Group's expectations of extension options and do not include non-lease components of a contract. A portfolio approach was taken when determining the implicit discount rate for the office premise and office car bay lease.

The lease liability is remeasured when there are changes in future lease payments arising from a change in rates, index or lease terms from exercising an extension or termination option. A corresponding adjustment is made to the carrying amount of the right-of-use assets, with any excess recognised in the consolidated statement of profit and loss.

Short-term leases and lease of low value assets

Short term leases (lease term of 12 month or less) and leases of low value assets are recognised as incurred as an expense in the consolidated statement of profit and loss.

Notes to the consolidated financial statements for the year ended 30 June 2024

p. Financial instruments

i) Financial assets at fair value through profit or loss

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss. The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under AASB 15. In order for a financial asset to be classified and measured at amortised cost, it needs to give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place are recognised on the trade date (the date that the Group commits to purchase or sell the asset).

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in following categories:

- (i) Financial assets at amortised cost (debt instruments)
- (ii) Financial assets at fair value through profit or loss
- (iii) derecognition (equity instruments)

(i) Financial assets at amortised cost (debt instruments):

The Group measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Financial assets at amortised cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

The Group's financial assets at amortised cost includes other receivables.

(ii) Financial assets at fair value through profit or loss:

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

(iii) Derecognition:

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership.

When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Notes to the consolidated financial statements for the year ended 30 June 2024

p. Financial instruments (continued)

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

Expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss will be recognised through an allowance. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL). For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

ii) Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

The Group's financial liabilities include trade and other payables.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

q. Impairment of assets

Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Non-financial assets other than goodwill that suffered impairment are reviewed for possible reversal of the impairment at each reporting date.

r. Foreign currency

Functional and presentation currency

The functional currency is measured using the currency of the primary economic environment in which the Group operates (the "functional" currency). The financial statements are presented in Australian dollars which is the Group's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary assets and liabilities are translated at the exchange rate at balance date. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction.

Exchange differences arising on the translation of monetary items are recognised in the statement of profit and loss, except where deferred in equity as a qualifying cash flow or net investment hedge.

Notes to the consolidated financial statements for the year ended 30 June 2024

s. Employee benefits

Wages, salaries, and other entitlements

Provision is made for the Group's liability for employee benefits arising from services rendered by employees to balance date. Employee benefits that are expected to be settled within one year have been measured at the amounts expected to be paid when the liability is settled. Employee benefits payable later than one year have been measured at the present value of the estimated future cash outflows to be made for those benefits. Those cash flows are discounted using market yields on national government bonds with terms to maturity that match the expected timing of cash flows. Employee benefits payable later than one year include Statutory Long Service Leave only.

Share based payments – employee share plan

Share based compensation has from time to time been provided to eligible persons via the Bounty Oil & Gas N.L. Employee Share Plan ("Plan"). Under AASB 2 "Share-based Payments", the Employee Share Plan shares are deemed to be equity-settled share-based remuneration.

Equity-settled share-based payments with employees and others providing similar services are measured at the fair value of the equity instrument at the grant date. Fair value is measured by use of the quoted market price or binomial pricing model. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity.

t. Provisions

Provisions are recognised when the Group has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result and that outflow can be reliably measured. Provisions are determined by discounting the expected future cash flows at a pre-tax discount rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

u. Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts.

v. Rehabilitation obligations

Provisions for future environmental restoration are recognised where there is a present obligation as a result of exploration, development, production or storage activities having been undertaken and it is probable that an outflow of economic benefits will be required to settle the obligation. The estimated future obligations include the costs of removing facilities, abandoning wells and restoring the affected areas.

The provision for future restoration costs is the best estimate of the present value of the expenditure required to settle the restoration obligation at the reporting date. Future restoration costs are reviewed annually and any changes in the estimate are reflected in the present value of the restoration provision at reporting date, with a corresponding charge in the cost of the associated asset.

The amount of the provision for future restoration costs relating to exploration, development and production facilities is capitalised and depleted as a component of the cost of those activities.

The unwinding of the effect of discounting on the provision is recognised as a finance cost.

w. Revenue and other income

Revenue is measured at the fair value of the consideration received or receivable after taking into account any trade discounts and volume rebates allowed. Any consideration deferred is treated as the provision of finance and is discounted at a rate of interest that is generally accepted in the market for similar arrangements. The difference between the amount initially recognised and the amount ultimately received is interest revenue.

Revenue from the sale of goods is recognised at the point of delivery as this corresponds to the transfer of significant risks and rewards of ownership of the goods and the cessation of all involvement in those goods.

Interest revenue is recognised using the effective interest rate method, which, for floating rate financial assets, is the rate inherent in the instrument. Dividend revenue is recognised when the right to receive a dividend has been established.

All revenue is stated net of the amount of goods and services tax (GST).

x. Goods and services tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the balance sheet are shown inclusive of GST.

Cash flows are presented in the cash flow statement on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

Notes to the consolidated financial statements for the year ended 30 June 2024

y. Earnings per share

The Group presents basic and diluted earnings per share ("EPS") for its ordinary shares. Basic EPS is calculated by dividing the profit attributable to equity holders of the Company by the weighted number of shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all potential ordinary shares, which comprises any share options issued.

z. Comparative figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

aa. Contributed equity

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction from the proceeds.

3. Critical accounting estimates and judgments

In the application of the group's accounting policies, which are described in Note 1, the directors are required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical and industry experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the critical judgments that management has made in the process of applying the group's accounting policies and that have the most significant effect on the amounts recognised in the financial statements:

Going concern basis:

Refer note 2(g) for the Directors assessment of the Group's going concern status.

Business combination

Management uses valuation techniques in determining the fair values of the various elements of a business combination. See Note 2(c)(iii).

Exploration and evaluation assets

The group's policy is discussed in Note 2(k). The application of these policies requires management to make certain estimates and assumptions as to future events and circumstances. Any such estimates and assumptions may change as new information becomes available. If after having capitalised exploration and evaluation expenditure, management concludes that the capitalised expenditure is unlikely to be recovered by future sale or exploitation, then the relevant capitalised amount will be written off through profit or loss.

Estimate of reserve quantities

The estimated quantities of proven and probably hydrocarbon reserves and resources reported by the group are integral to the calculation of amortisation (depletion) and depreciation expense and to assessments of possible impairment of assets. Estimated reserve quantities are based upon data from exploration and development drilling, interpretations of geological and geophysical models and assessment of the technical feasibility and commercial viability of producing the reserves. Management prepares reserve estimates which conform to guidelines prepared by the Society of Petroleum Engineers, USA. Where appropriate these estimates are then verified by independent technical experts.

These assessments require assumptions to be made regarding future development and production costs, commodity prices, exchange rates and fiscal regimes. The estimates of reserves may change from period to period as the economic assumptions used to estimate the reserves can change from period to period, and as additional geological or reservoir data is generated during the course of operations.

Provision for rehabilitation and decommissioning

The group estimates the future removal and decommissioning costs of oil and gas production facilities, wells, pipelines and related assets at the time of installation of the assets. In most instances the removal of these assets will occur many years in the future. The estimates of future removal costs therefore requires management to make adjustments regarding the removal date, future environmental legislation, the extent of decommissioning activities and future removal technologies.

Notes to the consolidated financial statements for the year ended 30 June 2024

Impairment of production and development assets

The group assesses whether oil and gas assets are tested for impairment on a semi-annual basis. This requires an estimation of the recoverable amount from the cash generating unit to which each asset belongs. The recoverable amount is assessed on the basis of the expected net cash flows that will be received from the asset's employment and or subsequent disposal. The expected net cash flows are discounted to their present values in determining the recoverable amount. Its policy for production and development assets is discussed in Note 2(l).

4. Segment Information

Information reported to the Chief Operating Decision Maker, being the CEO, for the purposes of resource allocation and assessment of the performance is more specifically focused on the category of business units. The Group's reportable segments under AASB 8 Operating Segments are therefore as follows:

Core Petroleum Segment - Oil and gas exploration, development and production

Secondary Segment - Investment in listed shares and securities.

Segment revenue and results

	Segment revenue		Segment profit/(loss)	
	30-Jun-24	30-Jun-23	30-Jun-24	30-Jun-23
	\$	\$	\$	\$
Core Oil & Gas Segment				
Production projects	1,612,955	1,768,947	47,332	(1,743,064)
Exploration projects	-	-	(28,000)	(36,411)
Secondary Segment				
Listed securities	20,821	(18,248)	20,821	(18,248)
Total from continuing operations	1,633,776	1,750,699	40,153	(1,797,723)
Other revenue			17,935	28,469
Corporate admin costs and directors remuneration			(984,149)	(1,141,935)
Loss before tax			(926,061)	(2,911,189)

Segment revenue

Revenue reported above represents revenue/income generated from external sources. There were no intersegment sales during the period (2023: nil).

Accounting policies of reportable segments

The accounting policies of the reportable segments are the same as the group's accounting policies described in Note 1. Segment profit/(loss) in this Note represents the profit/(loss) earned by each segment without allocation of central administration costs and directors remuneration, other investment revenue such as interest earned, finance costs and income tax expense. This is the measure reported to the Chief Operating Decision Maker for the purpose of resource allocation and assessment of segment performance.

Information about major customers

Included in the revenue arising from direct sales of oil and gas of \$1.61 million (2023: \$1.77 million) are revenues of approximately \$1.07 million (2023: \$1.18 million) which arose from sales to the Group's largest customer. The revenue from the Group's second largest customer was approximately \$0.54 million (2023: \$0.59 million). No other single customer contributed 10% or more to the Groups revenue for both 2024 and 2023.

Other segment information

	Amortisation, depreciation & depletion		Additions to non-current assets	
	30-Jun-24	30-Jun-23	30-Jun-24	30-Jun-23
	\$	\$	\$	\$
Core Oil & Gas Segment				
Production projects	273,833	326,864	595,191	656,792
Development projects	-	-	246,462	117,234
Exploration projects	28,000	-	76,065	190,596
Other	13,853	14,025	1,377	10,293
Total	315,686	340,889	919,095	974,915

**Notes to the consolidated financial statements
for the year ended 30 June 2024**

4. Segment Information (continued)

	Impairment losses/ Write-Off expenses	
	30-Jun-24	30-Jun-23
	\$	\$
Core Oil & Gas Segment		
Production projects	-	2,090,207
Exploration projects	-	36,411
Total	-	2,126,618

Segment assets are measured in the same way as in the financial statements. These assets are allocated based on the operations of the segment and the physical location of the asset.

Segment liabilities are allocated to segments where there is a direct nexus between the incurrence of the liability and the operations of the segment. Segment liabilities include trade and other payables and provisions.

The unallocated items include items that are not considered part of the core operations of any segment.

	Segment assets		Segment liabilities	
	30-Jun-24	30-Jun-23	30-Jun-24	30-Jun-23
	\$	\$	\$	\$
Core Oil & Gas Segment				
Production projects	3,276,408	2,928,300	2,826,294	2,160,223
Development projects	2,242,781	1,996,319	71,171	71,171
Exploration projects	2,249,326	2,173,261	38,836	38,836
Secondary Segment				
Listed securities	13,895	68,484	-	-
Unallocated	1,900,369	1,382,297	921,776	650,441
Total	9,682,779	8,548,661	3,858,077	2,920,671

Geographical Segment information

The following table details the group's geographical segment reporting of revenue and carrying amount of assets in each geographical region where operations are conducted.

	Revenue		Carrying amounts of non current assets	
	30-Jun-24	30-Jun-23	30-Jun-24	30-Jun-23
	\$	\$	\$	\$
Australia	1,651,711	1,779,168	7,896,622	7,043,213
Total	1,651,711	1,779,168	7,896,622	7,043,213

5. Revenue and other income

	30-Jun-24	30-Jun-23
	\$	\$
Sales revenue:		
Oil and gas sales	1,588,985	1,741,774
Revenue from tariffs	23,970	27,173
Total sales revenue	1,612,955	1,768,947
Investment income:		
Investment income from financial assets at fair value through Profit and loss (held for trading listed shares)		
Realised gain/(loss)	23,927	2,953
Unrealised gain/(loss)	(3,106)	(21,201)
Total investment income	20,821	(18,248)
Other income:		
Interest and dividend income	2,464	2,749
Other	-	-
Total other income	2,464	2,749
Gains/(losses) on foreign currency	15,471	25,720
Total revenue	1,651,711	1,779,168

Notes to the consolidated financial statements for the year ended 30 June 2024

6. Employee benefit expense

	30-Jun-24	30-Jun-23
	\$	\$
Directors fees	209,300	204,475
Consultancy fees - Internal	180,000	320,000
Wages & salaries	107,474	131,286
Other employee benefit expenses	45,299	42,208
Total Employee benefit expense	542,073	697,969

Recharge and recoveries

The Group has the policy to allocate a portion of employee benefit expense to production, development, exploration and evaluation assets based on employee time committed to various projects.

7. Income tax expense

The prima facie tax on profit from ordinary activities before income tax is reconciled to the income tax as follows:

Prima facie tax payable on profit/(income tax benefit) from continuing operations before income tax at 25% (2023 25%)

	\$	\$
Consolidated group	(231,515)	(727,797)
Add: tax effect of non deductible expenses	150,986	616,471
Less: tax effect of expenditure claimed as deduction	(105,869)	(483,016)
Tax effect of Unused tax losses not recognised as deferred tax asset:	(186,398)	(594,342)
Income tax expense attributable to loss from ordinary activities :	-	-
Total available income tax losses:	28,920,346	28,733,948

The potential future income tax benefit arising from tax losses and timing differences has not been recognised as an asset because recovery of tax losses is not probable and recovery of timing differences is not assured beyond reasonable doubt.

The potential future income tax benefit will be obtained if:

- 1) the relevant company derives future assessable income of a nature and an amount sufficient to enable the benefit to be realised, or the benefit can be realised by another company in the Group in accordance with Division 170 of the Income Tax Assessment Act 1997;
- 2) the relevant company and/or group continues to comply with the conditions for deductibility imposed by the Act; and
- 3) no changes in tax legislation adversely affect the Company and/or the group in realizing the benefit.

Bounty Oil and Gas NL and its wholly-owned subsidiaries have not formed a tax consolidation group.

8. Earnings/(loss) per share

Basic earnings/(loss) per share (cents per share)	(0.07)	(0.24)
Diluted earnings/(loss) per share (cents per share)	(0.07)	(0.24)
Net (loss)/profit used in the calculation of basic and diluted earnings/(loss) per share	(926,061)	(2,911,189)

	No. of Shares	No. of Shares
Weighted average number of ordinary shares for the purposes of basic and diluted EPS	1,498,500,982	1,370,500,982

9. Cash and cash equivalents

	\$	\$
Deposits on call	55,835	67,337
Cash at bank	1,505,431	1,170,424
Total Cash and cash equivalents	1,561,266	1,237,761

**Notes to the consolidated financial statements
for the year ended 30 June 2024**

10. Trade and other receivables

Total trade and other payables	2,266,192	1,526,508

**Notes to the consolidated financial statements
for the year ended 30 June 2024**

16. Provisions

	30-Jun-24	30-Jun-23
	\$	\$
Current - Provision for employee entitlement	107,753	126,706
Current - Rehabilitation costs – petroleum properties	507,678	-
	615,431	126,706
Non-current - Provision for employee entitlement	-	22,607
Non-current - Rehabilitation costs – petroleum properties	976,454	1,244,850
	976,454	1,267,457
Movement in provisions		
Opening balance	1,267,457	1,326,310
Unwinding of discount on provision	7,923	8,905
Net provisions recognised/(expensed)	(298,926)	(67,758)
Balance at the end of the period	976,454	1,267,457

The provision for rehabilitation costs represents the present value of best estimate of the future sacrifice of economic benefits that will be required to remove the facilities and restore the affected areas at the Group's operation sites. The rehabilitation of the petroleum properties is expected to be undertaken between 1 to 20 years. The discount rate used in the calculation of the provision as at 30 June 2024 was 4%, broadly equivalent to the Australian Government 10 year bond rate. Long service leave is measured at the present value of benefits accumulated at the end of financial year. The liability is discounted using an appropriate discount rate. The measurement requires judgement to determine key assumptions used in the calculation including futures pay increases and settlement dates of employee's departure.

17. Issued capital

A reconciliation of the movement in capital for the Company can be found in the Consolidated Statement of Changes in Equity
1,498,500,982 fully paid ordinary shares (2023: 1,370,500,982)

Change in inventory	12,345	11,149
Change in rehabilitation obligation	357,923	8,905
Net Cash from continuing operations	(327,971)	(1,144,344)

Notes to the consolidated financial statements for the year ended 30 June 2024

19. Share based payments

No share based payment compensation was granted to directors or senior management during the financial year ended 30th June 2024 and there was Nil expensed (2023: Nil). During the year, no directors or senior management exercised options that were granted to them as part of their compensation in prior periods.

20. Key management personnel

a) Key Management Personnel Compensation

The aggregate remuneration made to Key Management Personnel of the group is set out below:

Short term employee benefits

Share based payments

Total

	30-Jun-24	30-Jun-23
	\$	\$
	394,300	524,475
	-	-
	394,300	524,475

Apart from the details disclosed in this note, no director or key management person has entered into a material contract with the consolidated entity since the end of the previous financial year and there were no material contracts involving directors' or executives' interests existing at year-end.

Information regarding individual directors' and executives' compensation and some equity instrument disclosures as permitted by the Corporations Regulations 2M.3.03 is provided in the Remuneration Report section of the Directors' Report.

b) Equity Instrument Disclosures Relating to Key Management Personnel

i) Options provided as remuneration and shares issued on exercise of such options: Nil

ii) Share holdings

The movement during the reporting period in the number of ordinary shares and options in Bounty Oil and Gas N.L. held, directly, indirectly or beneficially, by each key management person, including related parties, are as follows:

(a) In 2023, 1,900,000 shares purchased was disclosed by error, now reflected correctly.

No shares or options were granted to key management personnel during the financial year or during the previous financial year. Listed options have exercise price of \$0.025 expiring 30 November 2025.

Notes to the consolidated financial statements for the year ended 30 June 2024

20. Key management personnel (continued)

c) Key Management Personnel - other loans and advances

No loans were made to key management personnel including their personally related entities during the financial year and no loans were outstanding at the end of the prior period. During the year the Company was advanced \$157,000 by a related entity of the CEO. The advance was repaid within 30 days along with interest disclosed in note 20(d).

d) Other transactions with key management personnel

Other than the transactions disclosed in the Remuneration Report contained in the Directors' Report, during the financial year \$81,500 was paid for office rent to a related entity of the CEO.

During the financial year \$64,000 was paid for secretarial and administrative services to spouse of Director Mr. Sachin Saraf. Such services were obtained in ordinary course of business and at a market hourly rate for similar services.

Aggregate amounts of each of the above types of other transactions with entities associated with key management personnel of Bounty Oil & Gas NL:

	30-Jun-24	30-Jun-23
	\$	\$
Secretarial services fee	64,000	-
Interest on short term advances	1,044	-
Rent of office	81,500	81,500
	146,544	91,400

21. Commitments

In order to maintain current rights of tenure to its licences and permits, the company has certain obligations to perform work in accordance with the work programmes, as approved by the relevant statutory body, when the permits are granted. These work programs form the capital commitment which may be renegotiated, varied between permits, or reduced due to farm-out, sale, reduction of permit/licence area and/or relinquishment of non-prospective permits. Work in excess of the work programs may also be undertaken.

The following capital expenditure requirements have not been provided for in the accounts:

Payable

	\$	\$
Not longer than 1 year	1,600,000	1,488,000
Longer than 1 year and not longer than 5 years	3,520,000	3,720,000
	5,120,000	5,208,000

There are no lease commitments at the balance date.

22. Related party transactions

a. The Group's main related parties are as follows:

Key Management Personnel

Any person(s) having authority or responsibility for planning, directing and controlling the activities of the Group, directly or indirectly, including any director (whether executive or otherwise) of the Group are considered as key management personnel.

Disclosures relating to key management personnel are set out in Note 20 and in the Directors Report.

Controlled entities

Details of the percentage of ordinary shares held in controlled entities are disclosed in Note 24.

All inter-company loans and receivables are eliminated on consolidation and are interest free with no set repayment terms.

b. Transactions with other related parties:

The Group has a related party relationship with its joint ventures/joint operations (note 25) and with its key management personnel. The Company and its controlled entities engage in a variety of related party transactions in the ordinary course of business. These transactions are generally conducted on normal terms and conditions.

There were no transactions with related parties other than as disclosed in Note 20 and this Note 22.

23. Financial instruments

a) Capital management:

The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximising the return to stakeholders. The Group's overall strategy remains unchanged from last financial year. The Group's capital structure consists of equity (comprising issued capital, reserves and retained earnings as detailed in Consolidated Statement of Changes in Equity) and no debt. The Group is not subject to any externally imposed capital requirements.

Notes to the consolidated financial statements for the year ended 30 June 2024

23. Financial instruments (continued)

a) Capital management (continued):

The Board reviews the capital structure of the Group on an on-going basis. As part of this review, the Board considers the cost of capital and associated risks.

The gearing ratio at the end of the reporting period was nil (2023: nil).

b) Categories of financial instruments:	Note	30-Jun-24	30-Jun-23
		\$	\$
Financial assets			
Cash and cash equivalents		1,561,266	1,237,761
Loans deposits and receivables		179,705	216,417
Available for sale financial assets designated as at FVTPL	12	13,895	68,484
Total financial assets		1,754,866	1,522,662
Financial liabilities			
Other amortised cost - trade creditors		(2,266,192)	(1,526,508)
Total financial liabilities		(2,266,192)	(1,526,508)

c) Financial risk management objectives:

The main risks the company is exposed to through its financial instruments are interest rate risk, foreign currency risk, liquidity risk, credit risk and price risk.

Foreign currency risk:

Foreign currency risk is managed by retaining majority of its cash and payables in Australian currency. Petroleum sales are received in USD with short term credit terms. The Group does not currently use derivative financial instruments to hedge foreign currency risk and therefore is exposed to daily movements in exchange rates. However, the Group intends to maintain sufficient USD cash balances to meet its USD obligations.

Liquidity risk:

The Group manages liquidity risk by maintaining adequate reserves and banking facilities by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Credit risk:

Credit risk refers to the risk that a counter party will default on its contractual obligations resulting in a financial loss to the Group and arises principally from the Group's receivables from customers and cash deposits. The Group's 2024 trade receivables are deposits and amounts due from State government departments and major Oil & Gas companies in Australia. The Group exited the joint operations during the year and these receivables have now been adjusted against related payables, and balance fully impaired.

The Company does not have any material credit risk exposure to any single debtor or company of debtors under financial instruments or collateral securities entered into by the Company.

Exposure to credit risk is monitored on an ongoing basis. The maximum exposure to credit risk is represented by the carrying amount of each financial asset in the statement of financial position.

The carrying amount of the Group's financial assets represents the maximum credit exposure. The Group's maximum exposure to credit risk at the reporting date was:

	30-Jun-24	30-Jun-23
	\$	\$
Carrying amount:		
Cash and cash equivalents	1,561,266	1,237,761
Trade and other receivables	179,705	216,417
	1,740,971	1,454,178

All cash held by the Group is deposited with investment grade banks and any expected credit loss is immaterial.

The aging of the Group's trade receivables at reporting date was:

	30-Jun-24		30-Jun-23	
	Gross \$	Impairment \$	Gross \$	Impairment \$
Past due	-	-	-	-
Not past due	175,064	-	155,567	-

Commodity risk:

The sales revenue of the company is derived from sales of oil at the prevailing \$US TAPIS or Dated Brent oil price on the Singapore market. The Group does not trade in derivative contracts to manage price and exchange risk.

d) Fair value of financial instruments:

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Notes to the consolidated financial statements for the year ended 30 June 2024

d) Fair value of financial instruments (continued):

The fair values of financial assets and liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices. The fair values of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

Except as detailed in the following table, the directors consider that the carrying amounts of financial assets and financial liabilities recognised in the consolidated financial statements approximate their fair values.

Consolidated	Fair value hierarchy	30-Jun-24	30-Jun-23
		\$	\$
Financial assets at fair value through profit or loss (see note 12)	Quoted bid prices in an active market		
	Level 1	13,895	68,484

e) Sensitivity analysis

As not material, the Group does not perform sensitivity analysis with respect to interest rate risk, foreign currency risk, liquidity risk, credit risk or price risk.

24 . Controlled entities

The consolidated financial statements incorporate the assets, liabilities and results of the following controlled entities in accordance with the accounting policy described in note 2 (c)(i).

Name of entity	Country of Incorporation	Class of shares	30-Jun-24	30-Jun-23
			Equity holding % (1)	
Ausam Resources Pty Ltd.	Australia	Ordinary	100	100
Interstate Energy Pty Ltd.	Australia	Ordinary	100	100
Rough Range Oil Pty Ltd.	Australia	Ordinary	100	100
Australian Oil Company No. 3 Pty Ltd.	Australia	Ordinary	100	-

(1) The proportion of ownership interest is equal to the proportion of voting power held.

25. Interest in joint operations

Set out below are the joint arrangements of the Group as at 30 June 2024, which in the opinion of the directors are material to the Group:

Name of the joint arrangement	Principal activity	Measurement Method	Principal place of business	Ownership interest (%)	
ATP 1189P Naccowlah block	Production	Proportionate	Adelaide, Australia	2%	2%
PEP11	Exploration	Proportionate	Perth, Australia	15%	15%

The company holds 2% interest in various Petroleum Leases and part of ATP 1189P, Queensland and associated oil production tangibles and pipelines referred to as the Naccowlah Block.

Details of the total revenue and expenses derived from or incurred in ATP 1189P joint operations and the company's share of the assets and liabilities employed in these joint operations are as follows:

	30-Jun-24	30-Jun-23
	\$	\$
Revenue from petroleum	1,612,955	1,768,947
Petroleum and all other expenses	(1,212,809)	(1,421,804)
Net Profit/(Loss) from joint operations	400,146	347,143
Current assets		
Trade receivables	175,064	126,641
Inventories	31,290	43,635
Non current assets		
Property, plant & equipment (net of accumulated depreciation)	893,687	856,200
Other non-current assets	1,955,525	1,625,661
Total assets in joint operations	3,055,566	2,652,137
Current liabilities - Trade and other payables	1,158,693	480,155
Non current liabilities - Provisions	976,454	983,349
Total liabilities in joint operations	2,135,147	1,463,504
Net interest in joint operations	920,419	1,188,633

Notes to the consolidated financial statements for the year ended 30 June 2024

25. Interest in joint operations (continued)

The Group's joint operations agreements require majority consent from all parties for all relevant activities. The joint participants own the assets of the joint operations as tenants in common and are jointly and severally liable for the liabilities incurred by the joint operations. These entities are therefore classified as joint operations and the group recognises its direct right to the jointly held assets, liabilities, revenues and expenses as described in note 2(c)(ii) & 2(d).

The accounting policies adopted for the group's joint operations are consistent with those in previous financial year.

The company's share of revenue and expenses from joint operations are included in the Consolidated Statement of Profit and Loss. The company's share of the assets and liabilities held in joint operations are included in the Consolidated Statement of Financial Position.

Interests in other joint operation entities

Also included in the Consolidated Financial Statements as at 30 June 2024, the group held interests in joint operations whose principal activities were exploration, evaluation and development of oil and gas but not accruing material revenue.

The company contributes funds to the joint operations for its share of total expenditure. Other than the ATP1189P Naccowlah Block production Joint Operations none of the joint operations hold any material assets and accordingly the Company's share of exploration, evaluation and development expenditure is accounted for in accordance with the policy set out in Note 1.

26. Parent entity information

The accounting policies of the parent entity, which have been applied in determining the financial information shown below, are same as those applied in the consolidated financial statements. Refer to Note 1 for a summary of the significant accounting policies relating to the Group. After review of policies, the Board resolved to reclassify the intercompany loans to controlled entities as non current assets.

The individual financial statements for the parent entity Bounty Oil & Gas NL show the following aggregate amounts:

Statement of Financial Position	30-Jun-24	30-Jun-23
	\$	\$
Assets		
Current assets	1,727,868	1,452,337
Non-current assets	12,796,932	11,746,232
Total Assets	14,524,800	13,198,569
Liabilities		
Current liabilities	1,689,142	915,790
Non-current liabilities	976,454	1,005,956
Total Liabilities	2,665,596	1,921,746
Net Assets	11,859,204	11,276,823
Equity		
Issued capital	48,549,530	47,426,757
Reserves	201,600	201,600
Retained earnings/Accumulated losses	(36,891,926)	(36,351,533)
Total Equity	11,859,204	11,276,824
Statement of Profit and Loss and other Comprehensive Income		
Loss for the year	(540,393)	(784,490)
Other comprehensive income/(loss)	-	-
Total Comprehensive loss for the year	(540,393)	(784,490)
Commitments for Capital Expenditure		
No longer than 1 year	660,000	975,000
Longer than 1 year and not longer than 5 years	1,452,000	2,437,500
Total	2,112,000	3,412,500

There are no operating lease commitments at the balance date.

**Notes to the consolidated financial statements
for the year ended 30 June 2024**

27. Contingent liabilities and contingent assets

As at the date of this report, there were no contingent assets or liabilities.
There was no litigation against or involving the parent entity Bounty Oil & Gas N.L.

28. Events occurring after the reporting period

No other matters or circumstances have arisen since the end of the financial year which have significantly affected or may significantly affect the operations of the company, the results of those operations, or the state of affairs of the company in future financial years.

29. Auditors remuneration

Remuneration of the auditors of the Company for:
- Auditing or reviewing the financial reports for year
Total

	30-Jun-24	30-Jun-23
	\$	\$
	36,220	36,000
	36,220	36,000

The auditor to Bounty Oil & Gas NL is GCC Business and Assurance Pty Ltd., Suite 807, 109 Pitt Street, Sydney NSW 2000.

30. Company details

DIRECTORS' DECLARATION

a) The directors of Bounty Oil and Gas NL ("the Company") declare that the financial statements and notes, as set out on pages 17 to 43 are in accordance with the Corporations Act 2001:

(i) comply with Accounting Standards and the Corporations Regulations 2001; and
(ii) give a true and fair view of the financial position as at 30th June 2024 and of the performance for the year ended on that date of the Company;

b) The Chief Executive Officer and the Chief Financial Officer have each declared that:

(i) The financial records of the company for the financial year have been properly maintained in accordance with Section 286 of the Corporations Act 2001.

(ii) The financial statements and notes for the financial year comply in all material respects with the Accounting Standards;

(iii) The financial statements and notes give a true and fair view.

c) In the directors' opinion, there are reasonable grounds to believe that the company will be able to pay its debts as when they become due and payable.

This declaration is made in accordance with a resolution of the Board of Directors.

Graham Reveleigh
Chairman - Board of Directors

Dated: 25 September 2024

**INDEPENDENT AUDITOR'S REPORT
TO THE MEMBERS OF BOUNTY OIL & GAS NL**

Report on the Audit of Consolidated Financial Statements

Opinion

We have audited the financial report of BOUNTY OIL & GAS NL and its controlled entities the group which comprises the consolidated statement of financial position as at 30 June 2024, the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the financial statements, including a summary of material accounting policies information and the directors' declaration.

In our opinion, the accompanying financial report of BOUNTY OIL & GAS NL and its controlled entities is in accordance with the *Corporations Act 2001*, including:

- (a) giving a true and fair view of the group's financial position as at 30 June 2024 and of its performance for the year ended on that date; and
- (b) complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis of Opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial report section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the accounting professional and ethical standards board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Group, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report for the year ended 30 June, 2024. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have fulfilled the responsibilities described in the auditor's responsibilities for the Audit of the Financial Report section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the financial report. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis of our audit opinion on the accompanying financial report.

G.C.C BUSINESS & ASSURANCE PTY LTD

Key Audit Matters

We have determined the matters described below to be the key audit matters to be communicated in our report.

Description of Key Audit Matter	How Our Audit Addressed the Key Audit Matter									
<p>1. The basis of going concern is a key audit matter (refer to Note 2(g))</p>	<p>We performed the following audit procedures, amongst others:</p> <ul style="list-style-type: none"> We assessed whether events or conditions cast significant doubt over the ability of the Group to continue as a going concern. We obtained Directors and management's assessment on the going concern assumption. We obtained and assessed the reasonableness of the group's cash flows forecasts for its operations and plans over the coming year. We reviewed for the group's commitments, creditors, obligations and contingent liabilities to assess whether reasonably considered in the cash flows forecasts. We considered appropriateness of the disclosure of assets and liabilities between current and non-current classifications. We discussed with Directors and management the plan for additional capital or borrowings to be raised. We reviewed the group's going concern disclosures in the financial report to assess whether a fair picture of the current going concern status was presented and to determine the reasonableness of the Directors opinion that the use of going concern basis of accounting remained appropriate. 									
Description of Key Audit Matter	How Our Audit Addressed the Key Audit Matter									
<p>2. Impairment of carrying value of Exploration and Evaluation (E&E); Production and Development assets (P&D) - (refer to Note 2(k)).</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Carrying value</th> <th style="text-align: right;">2024 \$</th> <th style="text-align: right;">2023 \$</th> </tr> </thead> <tbody> <tr> <td>E&E</td> <td style="text-align: right;">2,249,326</td> <td style="text-align: right;">2,173,261</td> </tr> <tr> <td>P&D</td> <td style="text-align: right;">4,255,126</td> <td style="text-align: right;">3,721,980</td> </tr> </tbody> </table> <p>The assessment of the existence of impairment indicators and testing for impairment of PPE is a key audit matter given the significant proportion of PPE relative to total assets (82%). Additionally, the assessment of indicators of impairment is complex and involve management judgements including range of assumptions and estimation about the expected market conditions and economic activity.</p> <p>Australian Accounting Standards require the Group to assess throughout the reporting period whether there is any indication that an asset may either be impaired, or a previous impairment reversed. If any indication exists, the Group must estimate the recoverable amount of the asset.</p> <p>The Directors & CEO have performed impairment review each half-year. No impairment or write-off of any Exploration and Evaluation or Production and Development assets was made during the year.</p>	Carrying value	2024 \$	2023 \$	E&E	2,249,326	2,173,261	P&D	4,255,126	3,721,980	<p>Our procedures included, but were not limited to the following:</p> <ul style="list-style-type: none"> We noted the group's view of the impairment indicators through <i>Impairment Memorandum</i> prepared by the CEO. We assessed the validity of all the group's tenements and licenses, verifying the status of holdings, and reviewed supporting documentation for the renewal of any expired licenses. We evaluated the valuation methodology and other factors used to determine the recoverable amount, assessing the appropriateness of the impairment level and the relevant impairment indicators. We reviewed the assumptions and criteria applied by management in evaluating asset valuations, critically challenging the directors' assumptions supporting the assessment of impairment indicators. We assessed the level of amortisation applied to production and development assets to assess reasonableness. We also assessed the reasonableness and completeness of the Group's disclosures against the accounting policy AASB 6 <i>Exploration for and Evaluation of Mineral Resources</i> and AASB 136 <i>Impairment of Assets</i>.
Carrying value	2024 \$	2023 \$								
E&E	2,249,326	2,173,261								
P&D	4,255,126	3,721,980								

Information Other than the Financial Report and the Auditor's Report Thereon

The directors are responsible for the other information. The other information comprises the information included in the Group's annual report for the year ended 30 June 2024, but does not include the financial report and our auditor's report. Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon. In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Emphasis of matter – Material uncertainty related to the carrying value of the interest in the PEP 11 exploration permit included in Exploration and Evaluation assets

We draw attention to Note 2(k) in the financial report, which indicates that a material uncertainty exists in relation to the Consolidated Group's ability to realise the carrying value of the company's interest in the exploration permit in the ordinary course of business. Our conclusion is not modified in respect of this matter.

Responsibilities of the Directors for the Financial Report

The directors of the Group are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001*. The directors' responsibility also includes such internal control as the directors determine is necessary to enable the preparation of a financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibility for the Audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial report, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

Auditor's Responsibility for the Audit of the Financial Report (cont)

- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial report or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial report, including the disclosures, and whether the financial report represents the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, safeguards applied.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial report of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included in page 12 to 15 of the directors' report for the year ended 30 June 2024. In our opinion, the remuneration report of Bounty Oil & Gas NL, for the year ended 30 June 2024, complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Group are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

	Total Top 20 Holders	<u>434,085,211</u>	<u>28.97%</u>

- c) Options as at 13 September 2024:

- i) there were 428,565,681 listed and quoted options (\$0.025 exercise price, expiring 30 November 2025) over ordinary shares.
- ii) there were no unlisted options over ordinary shares.

2. Substantial Shareholders

As at 13 September 2024 there were no substantial shareholders as disclosed in substantial shareholders notices given to the company.

3. Issued Shares and Distribution

- a) The total number of fully paid ordinary shares on issue on 13 September 2024 was 1,498,500,982.
- b) There were 2,866 holders of less than a marketable parcel of ordinary shares, totalling 110,993,186 shares being 7.41% of number of fully paid ordinary shares on issue.
- c) The percentage of the total holding of the 20 largest shareholders of ordinary shares was 28.97% of issued capital.

4. Stock Exchange Listing

Quotation has been granted for all the ordinary shares of the company under the code BUY, and for quoted options under the code BUYO on the Australian Securities Exchange (ASX).

5. Income Tax

The company is taxed as a public company.

6. Voting Rights

The voting rights attaching to ordinary shares are governed by the Constitution. At a meeting of members every person present who is a member or representative of a member shall on a show of hands have one vote and on a poll, every member present in person or by proxy or by attorney or duly authorised representative shall have one vote for each share held. No options have any voting rights.

7. Additional Information

Information in these financial statements (or in the annual report) that relates to or refers to petroleum exploration and prospectivity or petroleum or hydrocarbon reserves or resources is based on information compiled and/or written by Mr Philip F Kelso the CEO of Bounty Oil & Gas NL. Mr Kelso is a Bachelor of Science (Geology) and has practised geology and petroleum geology for in excess of 45 years. He is a member of the Petroleum Exploration Society of Australia and a Fellow of the Australasian Institute of Mining and Metallurgy. Mr Kelso is a qualified person as defined in the ASX Listing Rules: Chapter 19 and consents to the reporting of that information in the form and context in which it appears in this report.

The company continues to comply with the ASX Listing Rules disclosure requirements. The company reports to ASX which makes available all reports to those who wish to access them. All ASX releases and other background information are posted regularly on the company's website. The company intends to post on its website its annual report and all other required notices to its shareholders.

The board reviews and receives advice on areas of operational and financial risks. Business risk management strategies are developed as appropriate to mitigate all identified risks of the business. The directors are aware of the guidelines for the content of a code of conduct to guide compliance with legal and other obligations to shareholders but have not formally established such a code. Where applicable to its activities, the directors ensure that the company is responsible to its shareholders, employees, contractors, advisers, individuals and the community.

8. Secretary

The name of the Secretary of the company is Mr. Sachin Saraf.

9. Share Buy Back

There is no current on market share buy-back.

Schedule of Petroleum Tenements – September 2024

Permit	Operator	Basin	Expires	Status	Interest	Gross Km ²	Net Km ²
Offshore Australia (NSW)

Operators / Notes
1. Bounty Oil & Gas NL
2. Asset Energy Pty Ltd - a wholly owned subsidiary of Advent Energy Ltd.
3. Rough Range Oil Pty Ltd. - a wholly owned subsidiary of Bounty Oil & Gas NL
4. Santos Limited group companies
5. Bounty Oil & Gas NL + Interstate Energy Pty Ltd. (a wholly owned subsidiary of Bounty Oil & Gas NL) farm in to earn 25% with option to earn up to 50%
6. Coastal Oil & Gas Pty Ltd
7. Petroleum Pipeline Licence 58 (Queensland)
8. NOPTA Currently considering JV's applications for variation of work program and extension of Permit term.
9. Ausam Resources Pty Ltd - a wholly owned subsidiary of Bounty Oil & Gas NL.

ABBREVIATIONS

The following definitions are provided for readers who are unfamiliar with industry terminology:

AVO	Specialised analysis of seismic data comparing amplitude of sound waves versus collection point offsets
Barrel (bbl/BBL)	A unit of volume of oil production, one barrel equals 42 US gallons, 35 imperial gallons or approximately 159 litres
Basin	A segment of the earth's crust which has down warped and in which sediments have accumulated, such areas may contain hydrocarbons
BCF/Bcf	Billion cubic feet, i.e. 1,000 million cubic feet (equivalent to approximately 28.3 million cubic metres) of gas
BOPD/BPD	Barrels of oil per day; barrels per day
Contingent Resources	Discovered resources, not yet fully commercial
CSG	Coal seam gas
GIIP	Gas initially in place
Lead	A structural or stratigraphic feature which has the potential to contain hydrocarbons
License	An agreement in which a national or state government gives an oil Company the rights to explore for and produce oil and/or gas in a designated area
MCF/Mcf	Thousand cubic feet – the standard measure for natural gas
MDRT	Measured depth below Rotary Table
MMB/mmb, MMBO/mmbo	Million barrels, million barrels of oil
MMCF/mmcf, MMCFG/mmcf, MMCFGPD/mmcf _{gpd}	Million cubic feet, million cubic feet of gas, million cubic feet of gas per day
NFE	Near field exploration well (for oil)
NOPTA	National Offshore Petroleum Title Authority (Australia)
P10	10% probability of occurrence
P90	90% probability of occurrence
PCA	Potential Commercial Area (State of Queensland)
Permeability	The degree to which fluids such as oil, gas and water can move through the pore spaces of a reservoir rock
Permit	A petroleum tenement, lease, licence or block
Play	A geological concept which, if proved correct, could result in the discovery of hydrocarbons
Plug and Abandon (P&A)	The process of terminating operations in a well. Cement plugs are set in the borehole and the rig moves off the location. The borehole is thus left in a safe condition. In some cases, where the Operator considers it possible that the well may be re-entered at a later date, the well may be only temporarily plugged and abandoned
P _{mean}	The average (mean) probability of occurrence
Porosity	The void space in a rock created by cavities between the constituent mineral grains. Liquids are contained in the void space
Prospect (petroleum)	A geological or geophysical anomaly that has been surveyed and defined, usually by seismic data, to the degree that its configuration is fairly well established and on which further exploration such as drilling can be recommended
Prospective Resources	Undisclosed resources
PRL	Petroleum Retention Lease (South Australia)
Reserves	Quantities of economically recoverable hydrocarbons estimated to be present within a trap, classified as prove, probably or possible
Reservoir	A subsurface volume of rock of sufficient porosity and permeability to permit the accumulation of crude oil and natural gas under adequate trap conditions

Seal, Sealing Formation	A geological formation that does not permit the passage of fluids. Refer also to Cap Rock
Seismic Survey	A type of geophysical survey where the travel times of artificially created seismic waves are measured as they are reflected in a near vertical sense back to the surface from subsurface boundaries. This data is typically used to determine the depths to the tops of stratigraphic units and in making subsurface structural contour maps and ultimately in delineating prospective structures
Spud	To start the actual drilling of a well
Stratigraphic Trap	A type of petroleum trap which results from variations in the lithology of the reservoir rock, which cause a termination of the reservoir, usually on the up dip extension
Structure	A discrete area of deformed sedimentary rocks, in which the resultant bed configuration is such as to form a potential trap for migrating hydrocarbons
Sub-basin	A localised depression within a basin
TCF/Tcf	Trillion cubic feet (of gas)
TVDS	Total vertical depth below Sea Level
Up-dip	At a structurally higher elevation within dipping strata
